

#### DEPARTMENT OF COMPUTER SCIENCE M.Sc., Computer Science

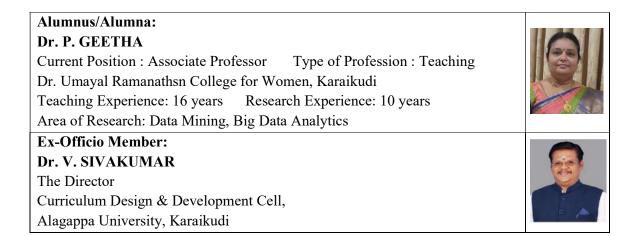

#### **REGULATIONS AND SYLLABUS** [For the candidates admitted from the Academic Year 2022 – 2023 onwards]

ALAGAPPA UNIVERSITY (A State University Accredited with "A+" grade by NAAC (CGPA: 3.64) in the Third Cycle and Graded as Category-I University by MHRD-UGC) Karaikudi -630003, Tamil Nadu.

#### The panel of Members-Broad Based Board of Studies

The panel of Members-Broad Based Board of Studies	1
Chairperson:	
Dr. T. MEYYAPPAN Professor & Head i/c, Department of Computer Science Alagappa University, Karaikudi Teaching Experience: 31 years Research Experience: 16 years Area of Research: Big Data Analytics, Image Processing and Networks	
Foreign Expert:Dr. ABDUL RAHAMAN WAHAB SAITKing Faisal University, Saudi ArabiaTeaching Experience: 19 yearsResearch Experience: 10 yearsArea of Research: Web Mining, Big Data Analytics, Machine Learning	
Indian Expert: Dr. P. KALAVATHY Professor, Department of Computer Science & Applications Gandhigram Rural Institute, Gandhigram Teaching Experience: 21 years Research Experience: 16 years Area of Research: Data Mining, Digital Image Processing	
Indian Expert:         Dr. M. BALAMURUGAN         Professor, Department of Computer Science         Bharathidasan University, Trichy         Teaching Experience: 28 years         Research Experience: 16 years         Area of Research: Big Data Analytics, Computational Intelligence, Digital         Image Processing	
Industry Expert: Dr. R. GOKULAKRISHNAN Joint Director, Software Technology Parks of India Ministry of Communication and IT Government of India, Chennai Teaching Experience: 7 years Industrial Experience: 14 Years Area of Research : Information Security, Historical Data Analysis and Nature based Algorithms	
Members:         1.       Dr. A. PADMAPRIYA         Professor, Department of Computer Science,         Alagappa University, Karaikudi         Teaching Experience: 19 years         Research Experience: 15 years         Area of Research: Data Mining, Big Data Analytics, Information and Network         Security, Communication Networks	
<ul> <li>Dr. S. SANTHOSH KUMAR</li> <li>Assistant Professor, Department of Computer Science,</li> <li>Alagappa University, Karaikudi</li> <li>Teaching Experience: 19 years Research Experience: 14 years</li> <li>Area of Research: Data Mining, Machine Learning, Health Care Analytics, IoT</li> </ul>	

#### ALAGAPPA UNIVERSITY DEPARTMENT OF COMPUTER SCIENCE Karaikudi -630003, Tamil Nadu.

#### **REGULATIONS AND SYLLABUS-(CBCS-University Department)**

[For the candidates admitted from the Academic Year 2022 – 2023 onwards]

Name of the Department	: Computer Science	
Name of the Programme	: M.Sc., Computer Science	
Duration of the Course	: Full Time (Two Years)	

#### **Choice-Based Credit System**

A choice-Based Credit System is a flexible system of learning. This system allows students to gain knowledge at their own tempo. Students shall decide on electives from a wide range of elective courses offered by the University Departments in consultation with the Department committee. Students can undergo additional courses and acquire more than the required number of credits. They can also adopt an inter-disciplinary and intra-disciplinary approach to learning and make the best use of the expertise of available faculty.

#### Programme

"Programme" means a course of study leading to the award of a degree in a discipline.

#### Courses

'Course' is a component (a paper) of a programme. Each course offered by the Department is identified by a unique course code. A course contains lectures/ tutorials/laboratory/seminar/project/practical training/report writing /Viva-voce, etc or a combination of these, to meet the teaching and learning needs effectively.

#### Credits

The term "Credit" refers to the weightage given to a course, usually in relation to the instructional hours assigned to it. Normally in each of the course's credits will be assigned on the basis of the number of lectures/tutorial/laboratory and other forms of learning required to complete the course contents in a 15-week schedule. One credit is equal to one hour of lecture per week. For laboratory/field work, one credit is equal to two hours.

#### Semesters

An Academic year is divided into two Semesters. In each semester, courses are offered in 15 teaching weeks and 5 more weeks are devoted to conduct of examination and evaluation purposes. Each week has 30 working hours spread over 5 days a week.

#### **Medium of Instruction**

English

#### **Departmental committee**

The Departmental Committee consists of the faculty of the Department. The Departmental Committee shall be responsible for admission to all the programmes offered by the Department including the conduct of entrance tests, verification of records, admission, and evaluation. The Departmental Committee determine the deliberation of courses and specifies the allocation of credits semester-wise and course-wise. For each course, it will also identify the number of credits for lectures, tutorials, practical, seminars etc.

The courses (Core/Discipline Specific Elective/Non-Major Elective) are designed by teachers and approved by the Departmental Committees. Courses approved by the Departmental Committees shall be approved by the Board of Studies/Broad Based Board of Studies. A teacher offering a course will also be responsible for maintaining attendance and performance sheets (CIA – I, CIA – II, assignments, and seminar) of all the students registered for the course. The Non-major elective programme, MOOCs coordinator and Internship Mentor are responsible for submitting the performance sheet to the Head of the department. The Head of the Department consolidates all such performance sheets of courses pertaining to the programmes offered by the department and forward the same to be Controller of Examinations.

8	J ( )	
PEO-1	Demonstrate proficiency in the analysis of complex problems and the synthesis of solutions to those problems with the help of computers	
PEO-2	Understand and use the modern software models and techniques	
PEO-3	Acquire broad understanding of database concepts and database management system software and Emerging Trends in computer science	
PEO-4	Learn the phases of compiler and explore knowledge about context free grammars, compiler parsing techniques, syntax directed definitions and translation schemes	
PEO-5	To understand necessary approaches and techniques to build protection mechanisms to secure personal information and computernetworks	
PEO-6	Learning basic and advanced methods in big data technology and tools, including MapReduce, Hadoop and its ecosystem	
PEO-7	Have a Good grounding of Web Application Terminologies, Internet Tools, E – Commerce and other web services	
PEO-8	Gives technology-oriented students the knowledge and skill to develop creative solutions	
PEO-9	Apply computer science theory and software development concepts to construction level	
PEO-10	Design and develop computer programs/computer systems in the fields related to algorithms, networks, web design, cloud computing, Artificial Intelligence, mobile applications	

#### **Programme Educational Objectives- (PEO)**

#### **Programme Specific Objectives-(PSO)**

PSO-1	Computer Science Postgraduates enriches their knowledge in special	
	areas of computing, such as open source programming, a	
intelligence, cloud computing, information and network security		
PSO-2 Computer Science Postgraduates will apply their knowledge an		
succeed in their career/ professional development and/or postgradua education to pursue flexible career paths amidst future technologie		
		changes
PSO-3 Our postgraduates will apply basic principles and practices of congrounded in mathematics and science to successfully complete has		
objectives and/or productively engage in research		
PSO-4	PSO-4 Our postgraduates will demonstrate a sense of societal and ethical responsibility in their professional endeavors, and will remain informed and involved as full participants in our profession and our society	
PSO-5	Our postgraduates will demonstrate strong communication skills and the	
	ability to function effectively in multi-disciplinary teams	

8		
PO-1	Students to have a wide perspective on software development including web-based applications as well as graphic applications	
PO-2	Apply knowledge of management theories and HR practices to solve business problems through global research.	
PO-3	Foster analytical and critical thinking abilities for data-based decision- making.	
PO-4	Inculcate contemporary business practices to enhance employability skills in the competitive environment.	
PO-5	Students will be able to solve simple computational problems using programing skills	
PO-6	Students will be able to bridge the gap between the industry and academia	
PO-7	Make them capable of working according to the current demand of the IT sector and responsible citizen	
PO-8	Be technology oriented, have knowledge and ability to develop creative solutions and a better understanding of future impacts development of computer systems and technology for people and to society	
PO-9	Able to understand the role of computer science in solving facts time problems in society	
PO-10	Develop programming, analytical and logical thinking skills	

#### **Programme Specific Outcomes-(PSO)**

PSO-1	Apply profound knowledge to analyze and design software and systems containing hardware and software components of varying complexity	
PSO-2	Analyze and identify the customer requirements in multidisciplinary domains, create high level design and implement robust software applications using latest technological skills	
PSO-3	Apply mathematical model, algorithmic principles, and computer science theory in the design of real-time applications	

PSO-4	Understand professional ethics and Cyber regulations and develop youth with social commitments.
PSO-5	Apply mathematical foundations, algorithmic principles, and Computer Science theory in the modeling and design of computational systems in a way that demonstrates comprehension of the tradeoffs involved in design choices.

#### Eligibility for admission

Candidates for admission to the first year of the Master of Science in Computer Science[M.Sc. (Computer Science) programme is required to pass in any one of the following Examinations of any recognized University with a minimum of 55% marks in Part-III (minimum 50% marks for SC/ST candidates):

B.Sc. Degree in Computer Science / Information Technology / B.C.A. / B. Voc (Software Development) or any qualification equivalent thereto in 10+2+3 pattern

#### Minimum Duration of programme

The programme is for a period of two years. Each year shall consist of two semesters viz. Odd and Even semesters. Odd semesters shall be from June / July to October / November and even semesters shall be from November / December to April / May. Each semester there shall be 90 working days consisting of 6 teaching hours per working day (5 days/week).

#### Components

A PG programme consists of a number of courses. The term "course" is applied to indicate a logical part of the subject matter of the programme and is invariably equivalent to the subject matter of a "paper" in the conventional sense. The following are the various categories of the courses suggested for the PG programmes:

*A*. Core courses (CC)– "Core Papers" means "the core courses" related to the programme concerned including practicals and project work offered under the programme and shall cover core competency, critical thinking, analytical reasoning, and research skill.

**B.** Discipline-Specific Electives –(DSE) means the courses offered under the programme related to the major but are to be selected by the students, shall cover additional academic knowledge, critical thinking, and analytical reasoning.

C. Non-Major Electives (NME)– Exposure beyond the discipline

• Students have to undergo a total of two Non Major Elective courses with 2 credits offered by other departments (one in II Semester another in III Semester).

• A uniform time frame of 3 hours on a common day (Tuesday) shall be allocated for the Non-Major Electives.

• Non-Major Elective courses offered by the departments pertaining to a semester should be announced before the end of previous semester.

• Registration process: Students must register for the Non- Major Elective course within 15 days from the commencement of the semester either in the department or NME Portal (University website).

#### D. Self Learning Courses from MOOCs platforms.

• MOOCs shall be on voluntary for the students.

• Students have to undergo a total of 2 Self Learning Courses (MOOCs) one in II semester and another in III semester.

• The actual credits earned through MOOCs shall be transferred to the credit plan of programmes as extra credits. Otherwise, 2 credits/course be given if the self Learning Course (MOOCs) is without credit. While selecting the MOOCs, preference shall be given to the course related to employability skills.

• While selecting the MOOCs, preference shall be given to the course related to employability skills.

E. Projects / Dissertation /Internships (Maximum Marks:200)

The student shall undertake the Project/Dissertation/internship during the fourth semester.

#### **Project/Dissertation**

The candidate shall undergo Project/Dissertation Work during the final semester. The candidate should prepare a scheme of work for the dissertation/project and should get approval from the guide. The candidate, after completing the dissertation /project work, shall be allowed to submit it to the university departments at the end of the final semester. If desirous of the candidate availing the facility from other is departments/universities/laboratories/organizations, they will be permitted only after getting approval from the guide and HOD. In such a case, the candidate shall acknowledge the same in their dissertation/project work.

#### **Internship**

The students who have opted for an Internship must undergo industrial training in the reputed organizations to accrue industrial knowledge in the final semester. The student must find industry related to their discipline (Public limited/Private Limited/owner/NGOs etc.,) in consultation with the faculty in charge/Mentor and get approval from the head of the department and Departmental Committee before going for an internship.

Project / Dissertation / Internship format details are given in Annexure - I

#### **Teaching methods**

Teaching method includes chalk and talk, ICT tools such as Power Point Presentation, Interactive board, online live lectures and webresources.

#### Attendance

Students must have earned 75% of attendance in each course to appear in the examination. Students who have earned 74% to 70% of attendance need to apply for condonation in the prescribed form with the prescribed fee. Students who have earned 69% to 60% of attendance need to apply for condonation in the prescribed form with the prescribed fee along with the Medical Certificate. Students who have below 60% of attendance are not eligible to appear for the End Semester Examination (ESE). They shall re- do the semester(s) after completion of the programme.

#### Examination

The examinations shall be conducted separately for theory and practical's to assess (remembering, understanding, applying, analysing, evaluating, and creating) the knowledge required during the study. There shall be two systems of examinations viz., internal and external examinations. The internal examinations shall be conducted as Continuous Internal Assessment tests I and II (CIA Test I& II).

#### **Internal Assessment**

The internal assessment shall comprise a maximum of 25 marks for each subject. The following procedure shall be followed for awarding internal marks.

Theory -25 marks			
Sr.No.	Content	Marks	
1	Average marks of two CIA test	15	
2	Seminar/group discussion/quiz	5	
3	Assignment/field trip report/case study report	5	
	Total	25	

#### Theory -25 marks

Practical -25 Marks

#### Project/Dissertation/ Internship – 50 Marks (assessed by Guide/incharge/HOD/ Supervisor)

1	Two presentations (mid-term)	30Marks
2	Progress report	20 Marks
	Total	50 Marks

#### **External Examination**

• There shall be examinations at the end of each semester, for odd semesters in the month of October / November; for even semesters in April /May.

• A candidate who does not pass the examination in any course(s) may be permitted to appear in such failed course(s) in the subsequent examinations to be held in October / November or April / May. However, candidates who have arrears in Practical shall be permitted to take their arrear Practical examination only along with Regular Practical examination in the respective semester.

• A candidate should get registered for the first semester examination. If registration is not possible owing to shortage of attendance beyond condonation limit / regulation prescribed OR belated joining OR on medical grounds, the candidates are permitted to move to the next semester. Such candidates shall re-do the missed semester after completion of the programme.

• For the Project Report/ Dissertation Work / internship the maximum marks will be 100 marks for project report evaluation and for the Viva-Voce it is 50 marks (if in some programmes, if the project is equivalent to more than one course, the project marks would be in proportion to the number of equivalent courses).

• Viva-Voce: Each candidate shall be required to appear for Viva-Voce Examination (in defense of the Dissertation Work//Project/ Internship).

#### F. Scheme of External Examination (Question Paper Pattern)

#### Theory - Maximum 75 Marks

Section A	10 questions. All questions carry equal marks. (Objective type questions)	10 x 1 = 10 Marks	10 questions – 2 each from every unit
Section B	5 questions Either / or type like 1.a (or) b. All questions carry equal marks, and each answer	5 x 5 = 25	5 questions – 1 each from every unit
Section C	5 questions Either / or type like 1.a (or) b. All questions carry equal marks, and each answer	5 x8 = 40	5 questions – 1 each from everyunit

Practical – Maximum 75 Marks

Section A	Aim, procedure / Algorithm and Program (2 Nos.)	20 Marks
Section B	Coding and Compilation	20 Marks
Section C	Debugging and Output	20 Marks
Section D	Record work	5 Marks
Section E	Vivo voce	10 Marks

#### 2. Dissertation /Project report/Internship report Scheme of evaluation

Dissertation /Project report/Internship report	100 Marks
Vivo voce	50 Marks

#### Results

The results of all the examinations will be published through the Department where the student underwent the course as well as through University Website.

#### Passing minimum

• A candidate shall be declared to have passed in each course if he/she secures not less than 40% marks in the End Semester Examinations and 40% marks in the Internal Assessment and not less than 50% in the aggregate, taking Continuous assessment and End Semester Examinations marks together.

- The candidates not obtained 50% in the Internal Assessment are permitted to improve their Internal Assessment marks in the subsequent semesters (2 chances will be given) by writing the CIA tests and by submitting assignments.
- Candidates, who have secured the pass marks in the End- Semester Examination and in the CIA but failed to secure the aggregate minimum pass mark (E.S.E + C I.A), are permitted to improve their Internal Assessment mark in the following semester and/or in University examinations.
- A candidate shall be declared to have passed in the Project / Dissertation / Internship if he /she gets not less than 40% in each of the Project / Dissertation / Internship Report and Viva-Voce and not less than 50% in the aggregate of both the marks for Project Report and Viva-Voce.
- A candidate who gets less than 50% in the Project / Dissertation / Internship Report must resubmit the thesis. Such candidates need to take again the Viva-Voce on the resubmitted Project report.

#### **Grading of the Courses**

The following table gives the marks, Grade points, Letter Grades and classifications meant to indicate the overall academic performance of the candidate.

Conversion of Marks to Grade Points and Letter Grade (Performance in Paper / Course)

RANGE OF MARKS	GRADE POINTS	LETTER GRADE	DESCRIPTION
90 - 100	9.0 - 10.0	0	Outstanding
80 - 89	8.0 - 8.9	D+	Excellent
75 - 79	7.5 - 7.9	D	Distinction
70 - 74	7.0 – 7.4	A+	Very Good
60 - 69	6.0 - 6.9	A	Good
50 - 59	5.0 - 5.9	В	Average
00 - 49	0.0	U	Re-appear
ABSENT	0.0	AAA	ABSENT

- a) Successful candidates passing the examinations and earning GPA between 9.0 and 10.0 and marks from 90 100 shall be declared to have Outstanding (O).
- b) Successful candidates passing the examinations and earning GPA between 8.0 and 8.9 and marks from 80 89 shall be declared to have Excellent (D+).
- c) Successful candidates passing the examinations and earning GPA between 7.5 7.9 and marks from 75 79 shall be declared to have Distinction (D).

- d) Successful candidates passing the examinations and earning GPA between 7.0 –
  7.4 and marks from 70 74 shall be declared to have Very Good (A+).
- e) Successful candidates passing the examinations and earning GPA between 6.0 –
  6.9 and marks from 60 69 shall be declared to have Good (A).
- f) Successful candidates passing the examinations and earning GPA between 5.0 –
   5.9 and marks from 50 59 shall be declared to have Average (B).
- g) Candidates earning GPA between 0.0 and marks from 00 49 shall be declared tohave Re-appear (U).
- h) Absence from an examination shall not be taken as an attempt.

From the second semester onwards the total performance within a semester and continuous performance starting from the first semester are indicated respectively by Grade Point Average (GPA) and Cumulative Grade Point Average (CGPA).

#### These two are calculated by the following formulate

#### GRADE POINT AVERAGE (GPA) = $\Box_i C_i G_i / \Box_i C_i$

#### GPA = <u>Sum of the multiplication of Grade Points by the credits of the courses</u> Sum of the credits of the courses in a Semester

Classification of the final result	
------------------------------------	--

CGPA	Grade	Classification of Final Result
9.5 - 10.0	0+	First Class – Exemplary*
9.0 and above but below 9.5	0	
8.5 and above but below 9.0	D++	First Class with Distinction*
8.0 and above but below 8.5	D+	CO.
7.5 and above but below 8.0	D	
7.0 and above but below 7.5	A++	First Class
6.5 and above but below 7.0	<b>A</b> +	
6.0 and above but below 6.5	Α	
5.5 and above but below 6.0	<b>B</b> +	Second Class
5.0 and above but below 5.5	В	
0.0 and above but below 5.0	U	Re-appear

The final result of the candidate shall be based only on the CGPA earned by the candidate.

 a) Successful candidates passing the examinations and earning CGPA between 9.5 and 10.0 shall be given Letter Grade (O+), those who earned CGPA between 9.0 and 9.4 shall be given Letter Grade (O) and declared to have First Class –Exemplary\*. b) Successful candidates passing the examinations and earning CGPA between 7.5 and 7.9shall be given Letter Grade (D), those who earned CGPA between 8.0 and 8.4 shall be given Letter Grade (D+), those who earned CGPA between 8.5 and 8.9 shall be given Letter Grade (D++) and declared to have First Class with Distinction\*.

c) Successful candidates passing the examinations and earning CGPA between 6.0 and 6.4 shall be given Letter Grade (A), those who earned CGPA between 6.5 and 6.9 shall be given Letter Grade (A+), those who earned CGPA between 7.0 and 7.4 shall be given Letter Grade (A++) and declared to have First Class.

d) Successful candidates passing the examinations and earning CGPA between 5.0 and 5.4 shall be given Letter Grade (B), those who earned CGPA between 5.5 and 5.9 shall be given Letter Grade (B+) and declared to have passed in Second Class.

i) Candidates those who earned CGPA between 0.0 and 4.9 shall be given Letter Grade

. 0

(U) and declared to have Re-appear.

e) Absence from an examination shall not be taken as an attempt.

#### CUMULATIVE GRADE POINT AVERAGE (CGPA) = $\Box n \Box i Cni Gni / \Box n \Box i Cni$

CGPA = <u>Sum of the multiplication of Grade Points by the credits of the entire Programme</u> Sum of the credits of the courses for the entire Programme

Where 'Ci' is the Credit earned for Course i in any semester; 'Gi' is the Grade Point obtained by the student for Course i and 'n' refers to the semester inwhich such courses were credited.

CGPA (Cumulative Grade Point Average) = Average Grade Point of all the Courses passed starting from the first semester to the current semester.

Note: \* The candidates who have passed in the first appearance and within the prescribed Semesters of the PG Programme are alone eligible for this classification.

#### Maximum duration of the completion of the programme

The maximum period for completion of M.Sc., in <u>COMPUTER</u> <u>SCIENCE</u> shall not exceed eight semesters continuing from the first semester.

#### ANNEXURE – I

□ No. of copies of the dissertation/project report/internship report

The candidate should prepare three copies of the dissertation/project/report and submit the same for the evaluation of examiners. After evaluation, one copy will be retained in the department library, one copy will be retained by the guide and the student shall hold one copy.

- Format to be followed for dissertation/project report
   The format /certificate for thesis to be followed by the student are given below

#### **Conferment of the Master's Degree**

A candidate shall be eligible for the conferment of the Degree only after he/ she has earned the minimum required credits for the Programme prescribed therefor (i.e. 90 credits) Programme).

#### **Village Extension Programme**

The Sivaganga and Ramnad districts are very backward districts where most people Lives in poverty.

The rural mass is economically and educationally backward. Thus, the aim of the introduction of this Village Extension Programme is to extend out to reach environmental awareness, social activities, hygiene, and health to the rural people of this region. The students in their third semester must visit any one of the adopted villages within the jurisdiction of Alagappa University and can arrange various programs to educate the rural mass in the following areas for three days based on the theme.1. Environmental awareness 2. Hygiene and Health. A minimum of two faculty members can accompany the students and guide them.

### C. Non Major Electives offered for other Departments

Core 1		Semest	er-l		
	Course Code 551101	Design And Analysis	Of Algorithms	T Credits:	5 Hours: 5
		Unit–	Ι		
<b>Objective</b>	To learn the bas	ics of algorithm, data str	ructures and asympt	otic notation	
Introduction	: - Algorithm D	efinition – Algorithm S	pecification – Perf	ormance Analy	sis-Asymptotic
	ementary Data S oint Set Union –	tructures: Stacks and Qu Graphs	ueues – Trees – Di	ctionaries – Pri	ority Queues -
	1	ne time and space compl	lexity of algorithms		K2
		Unit–			
<b>Objective 2</b>	To understand on methods	livide and conquer polic	ey and the working	principle of sea	arch and sort
Divide And	Conquer: The	General Method – Defe	ective Chessboard -	- Binary Search	n – Finding the
Maximum a	nd Minimum – I	Merge Sort – Quick Sor	t – Selection - Strag	ssen'sMatrix M	ultiplication.
Outcome 2	Able to imple	ment divide and conc	luer policy in sea	rch and sort	K3
	algorithms and	solve problems in fastes	t time.		
		Unit– 1	III RSITY		
Objective 3	To understand determination	the application of greed	y method in optima	al storage and	shortest path
Splitting – .	Job Sequencing v timal Merge Patte	eral Method - Container vith Deadlines - Minimu erns - Single Source Shor	um Cost Spanning rtest Paths.	Trees - Optima	
$\mathbf{\Omega}$	Abla to use ano				
Outcome 3	Able to use gree	edy principle to minimiz		problems.	K2
		Unit–1	IV	problems.	K2
			IV	problems.	K2
<b>Objective 4</b> <b>Dynamic P</b> Single-Sour Reliability 1 and Search	To understand § rogramming: - ' ce Shortest Path Design - The Tra Techniques: Tec	Unit–1	IV traversals Multistage Graphs - arch Trees - String blem - Flow Shop S ees – Techniques	- All-Pairs Sho Editing - 0/1 Scheduling. Bas for Graphs –	rtest Paths – Knapsack - sic Traversal
<b>Objective 4</b> <b>Dynamic P</b> Single-Sour Reliability 1 and Search Component	To understand g rogramming: - ' ce Shortest Path Design - The Tra Techniques: Tec s and Spanning Able to formu	Unit– graph representation and The General Method – N s - Optimal Binary Sea veling Salesperson Prob chniques for Binary Tro Trees – Biconnected O ate problems using gra	IV traversals Multistage Graphs - arch Trees - String blem - Flow Shop S ees – Techniques Components and DF	- All-Pairs Sho Editing - 0/1 Scheduling. Bas for Graphs – S.	rtest Paths – Knapsack - sic Traversal
<b>Objective 4</b> <b>Dynamic P</b> Single-Sour Reliability 1 and Search Component	To understand § rogramming: - ' ce Shortest Path Design - The Tra Techniques: Tec s and Spanning	Unit– graph representation and The General Method – Metho	IV traversals Multistage Graphs - arch Trees - String blem - Flow Shop S ces – Techniques Components and DF pphs and traversal	- All-Pairs Sho Editing - 0/1 Scheduling. Bas for Graphs – S.	rtest Paths – Knapsack - sic Traversal Connected
Objective 4 Dynamic P Single-Sour Reliability 1 and Search Component Outcome 4	To understand g rogramming: - ' ce Shortest Path Design - The Tra Techniques: Tec s and Spanning Able to formul reduce algorithm	Unit– graph representation and The General Method – N s - Optimal Binary Sea veling Salesperson Prob chniques for Binary Tre Trees – Biconnected O ate problems using gra n complexities Unit–	IV traversals Multistage Graphs - arch Trees - String blem - Flow Shop S ees – Techniques Components and DF phs and traversal	- All-Pairs Sho Editing - 0/1 Scheduling. Bas for Graphs – S.	rtest Paths – Knapsack - sic Traversal Connected
Objective 4 Dynamic P Single-Sour Reliability 1 and Search Component Outcome 4 Objective 5	To understand g rogramming: - 7 ce Shortest Path Design - The Tra Techniques: Tec s and Spanning Able to formul reduce algorithm	Unit– graph representation and The General Method – N s - Optimal Binary Sea veling Salesperson Prob chniques for Binary Tre Trees – Biconnected C late problems using gra n complexities Unit– packtracking technique in	IV         traversals         Multistage Graphs -         arch Trees - String         olem - Flow Shop S         ces - Techniques         Components and DF         ophs and traversal         V         n problem solving	- All-Pairs Sho Editing - 0/1 Scheduling. Bas for Graphs – S. techniques to	rtest Paths – Knapsack - sic Traversal Connected K5
Objective 4 Dynamic P Single-Sour Reliability 1 and Search Component Outcome 4 Objective 5 Backtracki	To understand g rogramming: - ' ce Shortest Path Design - The Tra Techniques: Tec s and Spanning Able to formut reduce algorithm To understand b ng: The General	Unit– graph representation and The General Method – N s - Optimal Binary Sea veling Salesperson Prob chniques for Binary Tre Trees – Biconnected O ate problems using gra n complexities Unit–	IV traversals Multistage Graphs - arch Trees - String blem - Flow Shop S ees – Techniques Components and DF phs and traversal V n problem solving s Problem – Sum o	- All-Pairs Sho Editing - 0/1 Scheduling. 		I - Semester			
Core – 2	<b>Course Code</b>	Advanced Database	Τ	Credits:5	Hours:5
	551102	<b>Management Systems</b>			
		Unit– I			
<b>Objective</b> 1	To acquire know	edge of Database Models in design	ning a	a database	
	<b>I And Parallel D</b> , ER-to-Relational M	atabase Design: Basics, Entity apping algorithm.	/ Ту	pes, Relations	hip Types,
Outcome 1	-	latabases using various data mod lization to resolve complex depend			K2
		Unit– II			
<b>Objective</b> 2	2 To understand the	e distributed database technology a	ind as	ssociated proto	cols
Normaliz	ation: Functional	Dependency, 1NF, 2NF, 3NF,	BC	NF, 4NF at	nd 5NF.
Architectu	re, I/O Parallelis	m, Interquery Parallelism,	Int	raquery Par	rallelism,
Intraopera	tion Parallelism, Int	eroperation Parallelism.			
Outcome 2	Able to design di	stributed, object-oriented and obje	ct-rel	ational databas	ses K3
	1	Unit– III			
<b>Objective</b> 3	To understand th	e way of representing spatial object	ts in	spatial databas	es
Distribute	d And Object B	ased Databases: Architecture,	Dis	tributed data	storage,
Distributed	l transactions, Comm	it protocols, Concurrency control,	Quer	y Processing.	
Outcome 3	Able to represent	and retrieve spatial data			K4
		Unit– IV			
<b>Objective</b> 4	To understand th	e ba <mark>sic</mark> s of XML hierarchical datal	base		
Spatial D	atabase: Spatial Da	tabase Characteristics, Spatial D	ata N	Iodel, Spatial	Database
		al Data <mark>base</mark> Query, Complex Da nce, array and Multiset,	ita T	ypes, Structure	ed Types
Outcome 4	Able to design, us applications.	e and exchange data in XML datab	ases	for different	<b>K</b> 1
		Unit– V			l.
Objective 5	To learn the ways databases	to represent temporal and multime	dia d	ata in respectiv	ve
Logic ba	sed Databases: Intr	oduction, Overview, Propositiona	l Cal	culus, Predica	te Calculus
Deductive	DatabaseSystems, R	ecursive Query Processing.			
Outcome 5	Able to represent databases	and retrieve time-stamped data and	l mul	timedia data in	K6

Core - 5	Course Code	Lab – I : Algorithms Using C++	Р	Credits: 4	Hours: 8				
	551105	and AdvancedJava							
		<b>Programming Lab</b>							
Objectives	➢ Learn to use the features of C++ and Advanced features of Java languages								
	to solveproblems.								
	➢ Learn to	use data structures and object-oriented	feature	es in C++ and Ja	iva language				
	Learn to write algorithms/programs for sorting and searching in C++								
	Learn to use various design pattern in Java programming								
	➤ Learn to	create web applications using applets, servlets, and database connectivity.							

#### Algorithms using C++

- 1. Sort a given set of elements using the Quicksort method and determine the time required to sort the elements. Repeat the experiment for different values of n, the number of elements in the list to be sorted and plot a graph of the time taken versus n. The elements can be read from a file or can be generated using the random number generator.
- 2. Using OpenMP, implement a parallelized Merge Sort algorithm to sort a given set of elements and determine the time required to sort the elements. Repeat the experiment for different values of n, the number of elements in the list to be sorted and plot a graph of the time taken versus n. The elements can be read from a file or can be generated using the random number generator.
- 3. Implement 0/1 Knapsack problem using Dynamic Programming.
- 4. From a given vertex in a weighted connected graph, find shortest paths to other vertices usingDijkstra's algorithm.
- 5. Find Minimum Cost Spanning Tree of a given undirected graph using Kruskal's algorithm.
- 6. Find Minimum Cost Spanning Tree of a given undirected graph using Prim's algorithm.
- 7. Implement 0/1 Knapsack problem using Dynamic Programming.
- 8. Implement N Queen's problem using Back Tracking

#### Advanced Java Programming Exercises:

- 1. Write a Java program to demonstrate the use of singleton design pattern
- 2. Write a Java program to demonstrate the use of factory design pattern
- 3. Write a Java program to demonstrate the use of adaptor design pattern
- 4. Write a Java program to create and use array list data structure.
- 5. Write a Java program to create and use priority queue data structure.
- 6. Write a Java program to create linked hash set data structure.
- 7. Write a Java swing program to draw graphics objects on the screen.
- 8. Write a Java Applet program for loan EMI calculator.
- 9. Write a GUI application for scientific calculator
- 10. Write a GUI application to produce bill for purchase of products

		Semester-II			
Core 6	Course Code 551201	Machine Learning	Т	Credits: 4	Hours: 4
	1	Unit– I	1	1	1
Objective 1	l To acquire know	ledge on the basic concepts of mach	nine lear	rning	
Machine Lea	arning: Problems	- Perspectives and Issues - Conc	ept Lea	rning – Versi	on Space
nd Candida	te Eliminations -	- Inductive bias – Decision Tree	learni	ng – Repres	entation -
Algorithm – I	Heuristic Space Se	arch.			
Outcome 1	Able to identify	problems and issues in machine lear	ning		K1
		Unit– II			
<b>Objective 2</b>	To understand B	ayesian and Computational Learnin	g princi	ples	
Bayesian A	nd Computation	al Learning: Bayes Theorem – Co	oncept I	Learning – M	aximum
Likelihood	– Minimum Deso	cription Length Principle – Bayes	Optim	al Classifier -	- Gibbs
Algorithm	– Naïve Bayes	Classifier – Bayesian Belief Net	twork -	– EM Algor	ithm –
-	-	ple Complexity – Finite and In		-	
Mistake Bo		ALL SOLO STATE		• •	
Outcome 2	Able to use Baye	sian and Probability learning princi	ples in	problem	K2
	solving		•	-	
	1	Unit– III			
<b>Objective 3</b>	To understand de	ecision tree learning and its state spa	ace sear	ch	
•		troduction – Representation – Ba			orithm-
Hypothesis	State space search	n in Decision Tree Learning – Indu	ctive B	ias- Issues – I	Instance
Based Learn	-	A A A			
Outcome 3	Able to solve a s	uitable problem with decision tree lo	earning	technique	K3
		Unit– IV			
<b>Objective 4</b>	To acquire basic	knowledge on artificial neural netw	orks		
Artificial N	eural Networks -	- Biological Motivation - Represen	tation-	Appropriate p	roblems
		tworks- Back propagation algorithm			
Outcome 4		se of simulated biological neurons in		em solving	K4
	using artificial ne	_	1	8	
	0	Unit– V			
<b>Objective 5</b>	To learn evolution	onary learning concepts using geneti	c algor	ithms	
0		hesis space search –Genetic program	•		volution
		genetic algorithms – Learning set	-		
		- Learning rule sets – First order ru			
Outcome 5		lutionary models and genetic algo			
	learning	, 6			_
	6				I

		Semester – II							
Core - 7	<b>Course Code</b>	Compiler Design	Т	Credits:4	Hours:4				
	551202								
Unit-I									
Objective	1 To acqu	ire knowledge on form all language the	eory and re	epresent tokens	of a				
	languag	e using regular expressions							
Introduct	ion To Lexical	Analysis: Overview of Language Pro	ocessing, '	The Structure	of Compiler				
design, Parameter passing mechanism - Symbol table-The role of the lexical analyzer - Input									
buffering	-Specification	of tokens-Recognition of tokens-F	inite aut	omata–NFA–D	FA-Regular				
expression	n to automata, Tr	ansition Diagram.							
Outcome	1 Learne	ers able to design new lexical analyzer f	or a new 1	anguage	K2				
		Unit - II							
Objective	2 To und	erstand syntax analysis and different pa	rsing tech	niques					
Syntax A	nalysis: The role	e of the parser – Parse tress – Derivatio	n - Conte	xt-free gramma	urs (CFG)				
Examples	- Writing a gran	mmar - Top down Parsing; Predictive	parsing -I	Bottom-up Pars	sing–Shift				
Reduce Parsing-LR parsers- LALR parsers-Limitations of syntax Analyzer.									
Outcome	2 Learne	ers able to design grammar for a language	ge and par	se it	K2				
Unit - III									
Objective	3 To Und	erstand Seman <mark>tic Analysis An</mark> d Transla	tion Of So	ource Code To					
	Interme	diate Code							
	-	rited and Synthesize data attributes –	_		-				
		S-attributed definitions -L-attributed of			-				
	ranslation – Syn	tax Directed translations schemes – St	orage orga	anization– Stac	k allocation				
of space.									
Outcome	3 Learne	ers able to do semantic analysis using at	tribute det	finitions	K3				
		Unit - IV							
Objective		erstand intermediate code generation for							
		ration: Variants of Syntax trees – The							
-		Blocks - Types and Declarations -		n of Expressi	ons–Type				
-		ckpatching-Switch Statements- Procedu							
Outcome		ers able to identify the importance of int	ermediate	code	K3				
	genera								
		Unit - V							
Objective		n various techniques in code generation							
		ode Optimization: Issues in the design		-	-				
		arget Code–Basic Block and Flowgrap	ns –Optim	ization of Basi	c Blocks-				
_		eephole Optimization.							
Outcom		ers able to do code optimization using v	arious tecl	nniques of	K4				
	optimi	zation

		II – Semester								
Core 9	Course Code	Wireless Sensor Networks	Т	Credits: 4	Hours:					
	551204				4					
Unit– I										
Objective: 1	<b>Objective: 1</b> To understand the Wireless Networks, Protocol Stack and Standards.									
Wireless Lan	- Introduction-WI	AN Technologies: Infrared, UHF N	Jarrowl	oand, Spread Sp	pectrum					
-IEEE802.11	System Architect	ure, Protocol Architecture, Physical	Layer,	MAC Layer, 8	02.11b,					
802.11a – H	iper LAN: WATM	A, BRAN, HiperLAN2 – Bluetoot	h: Arc	hitecture, Radio	o Layer,					
Baseband La	yer, Link Manage	er Protocol, Security – IEEE802.1	6-WIN	AX: Physical	Layer,					
MAC, Spectr	um Allocation For									
Outcome 1	Understand the	fundamentals of WSN			K4					
		Unit – II								
Objective 2 To get familiarize about Fundamentals of 3G Services, Its Protocols and										
	Applications.	11604560105								
Wireless Wid	le Area Network -	Overview of UTMS Terrestrial R	adio A	ccess Network	-UMTS					
Core Networ	rk Architecture: 3	G-MSC, 3G-SGSN, 3G-GGSN,	SMS-	GMSC/SMS-I	WMSC,					
	-	Speed Downlink Packet Access	(HSI	DPA)- LTE N	Network					
Architecture a		2 Art Solo								
Outcome 2		mbedded on web pages and will re	ealize t	he power of	K5					
	java programmin									
		Unit – III								
<b>Objective 3</b>		uting protocols in WSN								
U U	e	otocols Routing Challenges and Des	0							
	• • •	ng – Data <mark>ce</mark> ntric Routing – SPIN –								
	-	ed routing - Rumor Routing -		-						
	e	PEGASIS – Location Based Routin	•		-					
	•	– TEEN, APTEEN, SPEED, RA		00 0						
		egate Queries in Sensor Networks	- Agg	regation Techr	iques –					
TAG, Tiny D										
Outcome 3	Able to use effici	ent routing protocols in WSN			K6					

Unit – IV							
Objective 4         To study different types of embedded OS for WSN							
Embedded Operating Systems: Operating Systems for Wireless Sensor Networks							
Introduction - Operating System Design Issues - Examples of Operating Systems - TinyOS -							
Mate - MagnetOS - MANTIS - OSPM - EYES OS - SenOS - EMERALDS - PicOS							
Introduction to Tiny OS – NesC – Interfaces and Modules- Configurations and Wiring							
Generic Components -Programming in Tiny OS using NesC, Emulator TOSSIM.							
Outcome 4Able to choose suitable embedded OS for WSN applicationK5							
Unit – V							
Objective 5 To explore real world applications of WSN							
Applications of WSN: WSN Applications - Home Control - Building Automation - Industrial							
Automation - Medical Applications - Reconfigurable Sensor Networks - Highway Monitoring -							
Military Applications - Civil and Environmental Engineering Applications - Wildfire							
Instrumentation - Habitat Monitoring - Nanoscopic Sensor Applications - Case Study: IEEE							
802.15.4 LR-WPANs Standard - Target detection and tracking - Contour/edge detection - Field							
sampling.							
Outcome 5 Implement Different Type of Applications for Smart Phones and Mobile K4							
Devices withLatest Network Strategies

Core 1	Course Code 551205	Machine Learning and Functional Programming Lab	Р	Credits:	Hours: 8
Objectiv		ent FIND – S, ID3, Backpropagation mac	hine le	•	rithms
objectiv	-	ent Naïve Bayes, K-Nearest Neighbour cl			
		mple problems using functional program			
		omplex problems using functional program	-	-	
		ring related problems in Python	0	5	
Machi	e Learning Exerci				
	D – S Algorithm.				
	didate-Elimination	Algorithm			
	cision tree based ID	•			
	kpropagation algor				
5. Na	ve Bayesian classif	fier.			
6. EN	algorithm				
7. k-1	learest Neighbour a	lgorithm			
8. We	ighted Regression A	Algorithm			
Adva	ced Java Program	nming Exercises:			
1. W	ite a Python function	on to find the Max of three numbers.			
2. W	ite a Python function	on to sum all the numbers			
	in a list.Sample Lis	st : (8, 2, 3, 0, 7)			
	Expected Output : 2	20			
3. W	ite a Python function	on to multiply all the			
	numbers in a list.Sa	ample List : (8, 2, 3, -1, 7)			
	Expected Output : -	-336			
4. W	ite a Python progra	m to reverse a			
	tring. Sample Strin	g:			
	kquot;1234abcd&q				
	Output : "dcba				
5. W	•	on to calculate the factorial of a number (a	non-r	negative	
	•	on accepts the number as an argument.			
		on to check whether a number falls in a gi			
		on that accepts a string and calculate the n	umber	of upper	
ca	e letters andlower o				
	· ·	39;The quick Brow			
	Fox'Expected	l Output :			
	No. of Upper case				
	characters : 3 No. o				
	case Characters : 12	2			

8. Write a Python function that takes a list and returns a new list with unique elements of the firstlist.

Sample List : [1,2,3,3,3,3,4,5]

- Unique List : [1, 2, 3, 4, 5]
- 9. Write a Python function that takes a number as a parameter and check the number is prime ornot.
- 10. Write a Python program to print the even numbers from a given list. Sample List : [1, 2, 3, 4, 5, 6, 7, 8, 9]Expected Result : [2, 4, 6, 8]
- 11. Write a Python function to check whether a number is perfect or not.
  - According to Wikipedia : In number theory, a perfect number is a positive integer that is equal to the sum of its proper positive divisors, that is, the sum of its positive divisors excluding the number itself (also known as its aliquot sum). Equivalently, a perfect number is a number that is half the sum of all of its positive divisors (including itself).Example : The first perfect number is 6, because 1, 2, and 3 are its proper positive divisors, and 1 + 2 + 3 = 6. Equivalently, the number 6 is equal to half the sum of all its positive divisors: (1 + 2 + 3 + 6) / 2 = 6. The next perfect number is 28 = 1 + 2 + 4 + 7 + 14. This is followed by the perfect

numbers 496 and 8128.

- 12. Write a Python function that checks whether a passed string is palindrome or not.
  - i. Note: A palindrome is a word, phrase, or sequence that reads the same backward asforward, e.g., madam or nurses run.
- 13. Write a Python function that prints out the first n rows of Pascal's triangle.
  - b. Note : Pascal's triangle is an arithmetic and geometric figure first imagined by Blaise Pascal.Sample Pascal's triangle :
  - c. Each number is the two numbers above it added together
- 14. Write a Python function to check whether a string is a pangram or not.
  - d. Note : Pangrams are words or sentences containing every letter of the alphabet at least once.For example : & quot; The quick brown fox jumps over the lazy dog & quot;
- 15. Write a Python program that accepts a hyphen-separated sequence of words as input and prints the words in a hyphen-separated sequence after sorting them alphabetically.
  - e. Sample Items : green-redyellow-black-white Expected Result : black-green-red-whiteyellow
- 16. Write a Python function to create and print a list where the values are square of numbers between 1 and 30 (both included).
- 17. Write a Python program to make a chain of function decorators (bold, italic, underline etc.) inPython.

Semester III									
Core 12	Course Code 551302	IOT and Robotics	Τ	Credits: 4	H/W: 4				
	·	Unit– I							
Objective 1	To understand the	e characteristics and challenges of	f IoT						
Genesis of Io	T - IoT and Digit	ization – IoT Impact – IoT Chall	enges –	loT Network Ar	chitecture and				
	-	ecture – IoT Functional Stack –	-						
Stack				-	-				
Outcome 1	Appreciate the ne	ed for sophistication with IoT			K2				
		Unit– II			1				
<b>Objective 2</b>	To learn the layer	rs and things of IoT							
The "Thing	s" of IoT – Sense	ors, Actuators and Smart Objec	ts – Sen	sor Networks –	Connecting				
Smart Obje	ects – Communic	cation Criteria – IoT Access	Technolo	ogies – IEEE	802.15.4 –				
Standardizat	Standardization and Alliances – Physical Layer – MAC Layer – Topology – Security –								
Competitive Technologies									
Outcome 2	Able to use sense	ors and formulate communication	criteria f	or an application	K1				
		Unit– III	100						
0	To understand the		1.1						
	•	Ley advantages of Internet Proto							
		Optimization – Constrained n	odes – (	Constrained Net	works – IP				
	-	· IoT – Profiles and Compliances							
Outcome 3	Adopt existing pr	otocols for IoT application			K4				
		Unit– IV							
<b>Objective 4</b>	To learn the fund	amentals of Robotics	9						
Fundamenta	ls of Robotics- Ir	troduction - Automation and R	lobotics -	- Brief History	- Robotics				
Market and	Future Prospects-1	Programming and Applications –	Robot A	natomy					
Outcome 4	Appreciate the ap	pplication of Robots and its prosp	ects		K5				
		Unit– V							
U		e working principle of Robots and	11						
		systems – Control systems and I							
		Robotics sensors - Programmi	ng and	Working control	ol – Robot				
Applications									
Outcome 5	Able to propose a	a design a robot for specific applie	cation		K6

Core 15	Course Code	Lab – III: Advanced Web Technology	Р	Credits:	Hours: 8
	551305	and Data Analytics Lab		4	
Objectives	<ul><li>To design</li></ul>	web pages with CSS and HTML			
	<ul><li>To design</li></ul>	authentication web page			
	<ul><li>To perform</li></ul>	n session tracking with PHP			
	<ul><li>To perform</li></ul>	n file management operations in Hadoop and	Map I	Reduce for c	lata
	analytics				
	➢ To create ∑	XML data documents for data exchange			
Advanced	Web Technolo	gy Exercises:			
1. Creati	ing web pages w	ith advanced layouts and positioning with CS	S and	HTML.	
2. Devel	op and demonstr	rate the usage of inline, internal and external s	style s	heet using C	CSS
3. Perfor	rm validations in	a web page using JavaScript. For example			
	First Name (N	ame should contains alphabets and the length	shoul	d not be less	s than 6
	characters).				
	Password (Pas	sword should not be less than 6 characters len	igth).		
	E-mail id (sho	ould not contain any invalid and must follow	w the	standard pa	ttern
	name@domain	n.com)			
	Mobile Numbe	er (Phone number should contain 10 digits onl	ly).		
	Last Name and	l Address (should not be Empty).			
4. Devel	op and demonstr	rate JavaScript with POP-UP boxes and funct	ions fo	or the follow	ving
	Input: Click o	n Display Date button using onclick() function	on <b>Ou</b>	tput: Displa	ay date in
	thetextbox				
	Input: A num	per n obtained using prompt Output: Factoria	ıl of n	number usi	ng alert
	Input: A num	ber n obtained using prompt Output: A mult	iplica	tion table of	numbers
	from 1 to 10 of	n using alert			
	Input: A num	ber n obtained using prompt and add another	numb	er using co	nfirm
	Output: Sumo	of the entire n numbers using alert.			
5. Creati	ion of authentica				
6. Imple	mentation of Ro	llover menus in JavaScript			
		okies and Session in PHP			
8. Imple	mentation of Sea	ssion in PHP			
9. Using	PHP and MySQ	L, develop a program to create and accept bo	ok inf	ormation	
10. Desig	n an XML docu	ment to store information about students			
11. Create	e an application	that loads a text string into an XML DOM ob	ject, a	nd extracts	the info
from	it withJavaScrip	t.	-		
	-	HttpRequest, and retrieve data from a TXT fil	e.		
	-	equest to retrieve data from an XML file and		y the data in	an HTMI
table	*			-	
14. Devel	oping simple ap	plications using node.js			
		gularJS, Node JS and MySQL to access data	base		

#### **Data Analytics Lab Exercises:**

- 1. (i)Perform setting up and Installing Hadoop with operating mode
- 2. (i) Implement the following file management tasks in Hadoop:
- Adding files and directories
- Retrieving files
- Deleting files
  - (ii) Benchmark and stress test an Apache Hadoop cluster

3. Run a basic Word Count Map Reduce program to understand Map Reduce Paradigm.

- Find the number of occurrences of each word appearing in the input file(s)
- Performing a MapReduce Job for word search count (look for specific keywords in a file)
- **Outcome**  $\Box$  Able to design useful websites with CSS and HTML
  - □ Able to design and implement server-side programming with JavaScript and PHP.
  - □ Able to use cookies and session management for security
  - □ Able to use data analytic tool HADOOP and perform file management
  - □ Able to use MAP REDUCE, PIG-LATIN and Hive to handle unstructured data

		II- Semester			
*DSE 2	Course Code	A. R Programming	Т	Credits:3	H/W: 3
	551504				
<u></u>		Unit - I			
0		entals of R Programming la	0 0		
	•	dvantages of R over Other	•		
		comments –Handling Packa	-	-	-
	-	led. packages(), package l	-	· •	<b>-</b> •
		tering Data from keyboard	– Printing 1	lewer digits or n	nore digits-
-	e functions: NA and I		, · ,	11 1 1	D IZ1
Outcome 1	Learners understand Language.	I the fundamentals like h	ow to inst	all and work of	on R K1
	1	Unit - II			I
<b>Objective 2</b>	To understand the da	atatypes, operators and contr	col construc	ts of R language	
R Data Typ	es: Vectors, Lists. M	latrices, Arrays, Factors, D	ata Frame -	– R - Variables.	Datatypes-
• •		riables – R Operators: Arith			• •
U	U .	Operators, Miscellaneous	1	<i>,</i>	1 ,
<b>e</b> 1		else if statement, switch st	•		•
		nent: break statement, next s			
Outcome 2	Learners acquire know	wledge with essential progr	ramming co	oncepts in R.	K2
	0	Unit-III			I
<b>Objective 3</b>	To learn the built and	d functions and manipulatio	n of text da	ta.	
<b>R-Functions</b>	- function definition,	, Built in functions-user-de	fined funct	ion, calling a fu	nction with
		s – Manipulating Text in		-	
Sequence ve	ctor, rep function, ve	ector access, vector names,	vector ma	th, vector recyc	ling, vector
element sorti	ng - R List – Creatio	on and Manipulation of List	s - Merging	g Lists – Convei	ting List to
Vector – R M	Aatrices-Matrix Arith	nmetic Computations – R A	rrays – Na	ming Columns a	and Rows –
		Factors – creating factors, g			
Outcome 3	Learners gain knowl	edge on essential functional	ities in R.		K3
		Unit–IV			
<b>Objective 4</b>	To understand data F	Frame feature of R program	ning langua	age.	
Data Frame	-Creating and under	standing Data in Data Fram	e– Applyin	g functions on I	Data Frames
-		ame - Expanding Data Fr			
Columns - rb	ind() and cbind() – M	Merging Data frames merge	() – Meltin	g and Casting -	data melt(),
cast() - Loadi	ing and handling Data	a in R - Working Directory	-getwd(), s	setwd(), dir() - R	-CSV Files
- Input as a	CSV file -Reading	a CSV File, Analyzing the	e CSV File	e-summary(), m	in(), max(),
range(), mean	n median annly	Walting in the COV Elle	Deading de	ata from Excel fi	1
0	i(), median(), apply()	-Writing in to a CSV File	-Reauting ua		le.

Unit–V	
Objective 5 To gain proficiency in using R to perform descriptive statistics and create meaning	ful
data visualizations.	
Descriptive Statistics: Data Range, Frequencies, Mode, Mean and Median: Mean Applying	Гrim
Option, Applying NA Option, Median - Mode - Standard Deviation - Correlation -potting Probl	ems
in Data with Visualization: visually Checking Distributions for a single variable- R-Pie Charts:	: Pie
Chart title and Colors-Slice Percentages and Chart Legend, 3D Pie Chart- R Histograms - Der	nsity
Plot- R – Bar Charts: Bar Chart Labels, Title and Colors.	
Outcome 5         Learners evaluate statistical analysis and generate charts using R.	K6

II – Semester	
*DSE -2 Course Code B. Cloud Computing T Credits:3 551505	H/W: 3
Unit– I	
<b>Objective 1</b> To facilitate students to understand the concepts of cloud computing basics	
Computing Basics: Cloud computing definition- Characteristics- Benefit-Challenges-I	Distributed
Systems- Virtualization-Service-oriented computing - Utility-oriented computing-Build	ing Cloud
Computing environments - computing platforms & technologies - Cloud Models - Cloud	ud Service
Examples - Cloud Based Services & Applications - Cloud concepts and Technologies.	
Outcome 1 Completing this course should provide a good understanding of cloud	K1
computing	
Unit– II	
Objective 2         To learn about virtualization and cloud services	
Virtualization, Cloud Services and Platforms: Virtualization: Virtualization - Char	racteristics –
taxonomy - types - Pros and Cons - Examples Architecture: Reference model- type	
Compute Service - Storage Services - Cloud Database Services - Application Service	
Delivery Services - Analytics Services - Deployment and Management Service - Identity	y and Access
Management Services – Open Source Private Cloud Software	
Outcome 2 Gives a systematic knowledge of the fundamental technologies,	K3
architecture, and security	
Unit– III	
Objective 3 To acquire knowledge in designing and developing cloud applications	
Cloud Application Design And Development: Design consideration-Reference Arc	
Cloud Application – Cloud Application Design Methodologies - Data Storage	
Development in Python: Design Approaches – Application: Image Processing – Docume	ent Storage -
Map Reduce- Social Media Analytics.	<b>T</b> 7.4
Outcome 3 Understand the services offered by cloud computing environment.	K4
Unit–IV	
<b>Objective 4</b> To understand how Python is used in Clouds	
Python For Cloud: Introduction - Installing Python - Data types & Data Structures - Con	
	ntrol Flow-
Functions - Modules - Packages - File Handling - Date / Time Operations - Classes -	
Functions – Modules – Packages – File Handling – Date / Time Operations – Classes – Cloud: Amazon Web Services – Google Cloud Platform – Windows Azure – Map H	Python for
	Python for

Unit–V
<b>Objective 5</b> To understand different clouds and cloud security
Big Data Analytics, Multimedia Cloud & Cloud Security: BigData Analytics: Clustering Big data
Classification of Big Data - Recommendation systems. Multimedia Cloud: Case Study: Live Video
Stream App - Streaming Protocols - Case Study: Video Transcoding App - Cloud Security: CSA
Cloud Security Architecture - Authentication Authorization - Identity and Access Management-Dat
Security-Key Management- Auditing – Cloud for Industry, Healthcare & Education.
Outcome 5 Identify the importance of Big data analytics, multimedia cloud and cloud K6
security

<b>Course Outcome</b>	<b>VS Programme</b>	<b>Specific Outcomes</b>
-----------------------	---------------------	--------------------------

		II - Semester			
*DSE-2	Course Code 551506	C. Software Testing	Т	Credits: 3	Hours: 3
		Unit-I			
<b>Objective 1</b>	To understan	d the goals and levels of software	testing.		
Introductio	on: Introduction	to software testing-Goals of	software	testing-Softwa	re testing
foundations	-Software testing a	ctivities-Testing levels based on s	oftware ac	tivity-Coverage	e Criterion-
Module driv	ven test design.				
Outcome 1	Learners un	derstand the software testing activ	ities.		K2
		Unit - II			
<b>Objective 2</b>	2 To understan	d the phases of software project ar	nd models.		
Software d	evelopment life cy	cle models: Phases of software pro	oject - Qua	lity, Quality as	surance and
Quality Cor	ntrol -Verification a	nd Validation-Waterfall Model-Pr	ototyping a	and rapid applie	cation
developmen	nt model-Spiral or in	terative model-The VModel. Comp	parison of v	various lifecycl	e models.
Outcome 2	2 Students wil	l be able to evaluate different testi	ing models		K4
		Unit - III			·
<b>Objective 3</b>	To learn var	ious types of testing.	1		
Types of t	esting: White box	testing-Static Testing-Structural	Testing-B	lack box testi	ng-Domain
Testing-Inte	egration Testing-To	p-down integration - Bottom up	integration	n-Scenario test	ing-System
and Accepta	ance testing- Perfor	mance testing.			
Outcome 3	Students gai	n knowledge to perform various typ	oes of testin	g upon software	e K3
	product.				
	·	Unit - IV			
<b>Objective 4</b>	To be able to	develop test plan for Web and GU	Л ap <mark>plicat</mark> i	ons.	
Practical C	Considerations: Reg	gression Testing – Integration and	Testing-T	est process-Tes	t plans–
Identifying	correct outputs. Tes	sting Object-oriented software–Te	sting Web	applications an	d Web
services-Te	esting GUI–Real-tin	ne software and Embedded softwa	re.		
Outcome 4	Learners car	test web and GUI applications.			K5
		Unit - V			
<b>Objective 5</b>	To understar	nd test management and planning.			
U		<b>Festing:</b> Perceptions and Miscor	nceptions a	bout Testing-	Comparing
	-	nent Functions – Career paths for	-	-	
		Test Management and Automatio	-		
•		ware Test Automation– Case Stud	-		
Outcome		n choose career path as testing pro	-		K5
Suggested I					I
	0	n to software testing(2nded.). Cam	bridge Uni	versity press.	
		ware testing, Principles and pract	-	• •	
	•	chniques. Dream Tech publication			
Chauhan, N.	Software Testing.	Oxford University Press.

		III - Semester			
*DSE -3	Course Code 551509	C. Block Chain Technology	Т	Credits: 3	Hours: 3
		UNIT I		1	
Objectiv	ve 1 To introdu	ice the block chain technology and p	latform	ns of decentrali	zation
Introduct	tion: Introduction	to blockchain – Types of blockchain	-CAP	theorem and b	lockchain
benefits an	nd limitations of b	lockchain - Decentralization - Decen	ntraliza	tion using blo	ckchain –
Methods	of Decentralizatio	n - Routes to Decentralization - B	lockch	ain and full e	cosystem
Decentral	ization – Smart	Contract – Decentralization Org	ganizat	ions- Decent	ralization
applicatio	ns – Platforms of	Decentralization.			
Outcom	ne 1 Explore b Block cha	oth the conceptual as well as applicat in.	tion asp	pects of	K6
		UNIT II			<b></b>
Objectiv	ve 2 To learn t	he cryptographic principles			
Cryptogra	aphy & Techni	cal Foundation- Cryptography a	ind T	echnical Four	ndations –
Introductio	on – Cryptographi	c primitives – Asymmetric Cryptogra	nphy –	Public and Pri	vate keys –
Financial r	narketing and trad	ing.	2		
Outcom	ne 2 Understa	nd the fundamental design and archit	tectura	l primitives	K2
	of Block				
		UNIT III			
Objectiv		the transactions in bit coin			
		s-Blockchain-AlternativeCoins-bite	coinlim	nitations-Name	ecoin-
Litecoin-1		A FRADIA			1
Outcom	ne 3 Describ	e security aspects of blockchain tech	nology	7	K1
		UNIT IV	1		
Objectiv	ve 4 To learn	about smart contracts and Ethereum			
Smart Co	ontracts & Ether	eum-Smart Contracts – Ethereum 1	01 – II	ntroduction –	Ethereum
blockchai	n– Elements of H	Ethereum blockchain- Pre-complied	contra	acts- Account	s–Block–
Ether-Me	ssages-Mining-C	lients and Wallets-Trading and inves	stment-	-The	
Ethereum	network–Applicat	ions developed on Ethereum –Scalab	ility ar	nd security issu	les.
Outcom	ne 4 Develog	p smart contract applications in Ether	reum		K3
		UNIT V			
Objectiv	ve 5 To explo	re the challenges faced by blockchain	n techn	ology	
		lternative Blockchains-Blockchains			
		Things – Government – Health –	Financ	ce –Scalability	and other
challenges	-Scalability-Priva	ncy–Security.			
Outcom	ne 5 Identify	scalability and privacy issues of bloc	kchain	and	K3
	alternativ	ves to blockchain technology			

Suggested readings:
Bsahir, I. (2017). Mastering Blockchain - Master the theoretical and technical
foundations of Block chain technology and explore future of Block chain technology.
Create Space Independent Publishing Platform.
Narayanan, Bonneau, Felten, Miller, &Goldfeder. Bitcoin and Cryptocurrency
Technologies- A Comprehensive Introduction. Princeton University Press
Thompson, J.(2017). Blockchain: The Blockchain for Beginnings, Guild to Blockchain
Technology and Blockchain Programming. Create Space Independent Publishing
Platform.
Bashir, I. Mastering Blockchain : Distributed ledger technology, decentralization, and sm
Grincalaitis, M. Mastering Ethereum: Implement Advanced Blockchain Applications Using
Ethereum-supported Tools, Services, and Protocols. Packt Publishing.

**Course Outcome VS Programme Specific Outcomes** 

Semester- II									
NME1Course CodeOffice AutomationTCredits: 2	Hours: 3								
Unit-I									
<b>Objective 1</b> To Learn to work with windows and offices of software suite to automate	e office								
activities									
Introduction: Working with Windows - Office Programs - Title Bar - Status Bar - Menu Bar and									
Tool Bars - Using the Office Assistant - Using the Help Window - Creating Short Cut Icon	– Starting								
a program and opening a document - Saving and Naming a document - Using Favorite	Folders –								
Closing, Deleting and Undeleting a Document Renaming - Copying and Moving a Document	ocument –								
Finding the Document									
<b>Outcome 1</b> Learners able to work with windows and packages in Office software suite	K2								
Unit - II									
Objective 2         To Learn to create and format documents using Word Processor									
Word: Working with word documents - Moving, correcting and Inserting Text - H	Printing a								
Document - Editing, Selecting and Editing Text - Formatting - Changing Margins - Line	Spacing –								
Text Alignment - Font and Font Size - Indenting - Inserting - Page numbers and Break	s – Using								
Tables and Graphics – Creating Tables – Auto Formatting Table text									
Outcome 2 Learners able to create documents with tables, graphics and formatting	K3								
with page layout features									
Unit - III									
<b>Objective 3</b> To create and format workbooks using Excel									
Excel: Building a Worksheet – Selecting Worksheet Items – Using Auto fill – Adding and	Removing								
Rows and Columns – Copying and Moving Information – Creating and copying Formulas	– Naming								
Ranges - Using functions-Improving the Appearance of Worksheet -Changing colum	nn width–								
Formatting Text and Numbers-Using AutoFormat-Spell checking-Using Chart Wizard-	-Creating,								
Enhancing and Printing a chart									
Outcome 3 Learners able to create worksheets to perform What-If Analysis and	K3								
presentation graphics									
Unit - IV									
<b>Objective 4</b> To create databases and query them using Access									
Access: Creating a New Data Base - Creating and Saving a Table - Primary key creating	–Adding,								
Editing and Deleting fields - Changing the view and moving fields - Data entry andediting	g–Adding,								
Inserting and Deleting records-Adjusting Column width - Hiding Column - Finding I	Records –								
Sorting records - Creating, Saving and Editing a query - Forms - Autoform - Using Report	t Wizard –								
Creating and Printing Reports.									
<b>Outcome 4</b> Learners able to create databases, tables, queries, forms and reports	K4								

		Uni	it - V						
Objective 5	<b>Objective 5</b> To create slides and make presentation using PowerPoint								
MS PowerPoin	t and Integrating	Office Appli	cations: Power 1	Point Presentat	ion – Integratin	g			
Office Applicat	tions – Merging an	Access Rep	ort from an exc	el list – Creat	ting power poir	nt			
Presentation fro	m a word outline-	Creating a W	ord handout from	n a PowerPoir	nt binder-Startin	g			
outlook – Outloo	ok window-Using m	enus, dialogue	boxes–Existing (	Dutlook.					
Outcome 5	Learners able to cre	eate slide show	v for business / ed	ucation present	ation K4				
	with Text, Tables,	Charts and ani	mations
