Karaikudi - 630003. Tamil Nadu, India

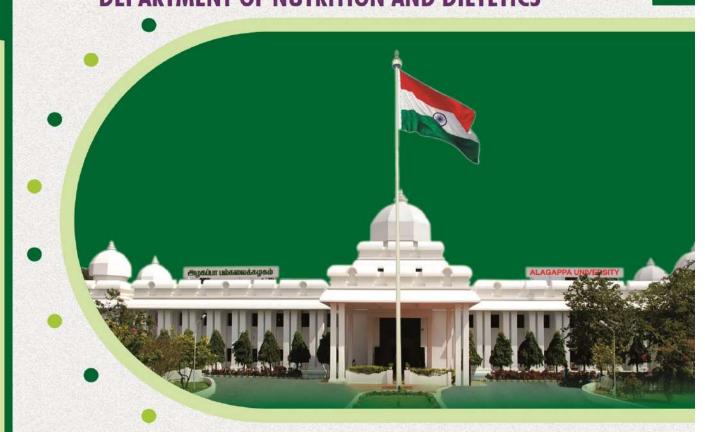

# FACULTY OF SCIENCE DEPARTMENT OF NUTRITION AND DIETETICS

# M.Sc., NUTRITION AND DIETETICS REGULATIONS AND SYLLABUS

(For the candidates admitted from the Academic Year 2023 - 2024)

# **DEPARTMENT OF NUTRITION AND DIETETICS M.Sc., Nutrition and Dietetics**

#### **REGULATIONS AND SYLLABUS**

[For the candidates admitted from the Academic Year 2023–2024 onwards]

#### **ALAGAPPA UNIVERSITY**

(A State University Accredited with "A+" grade by NAAC (CGPA: 3.64) in the Third Cycle and Graded as Category-I University by MHRD-UGC)

Karaikudi -630003, Tamil Nadu.

# ALAGAPPA UNIVERSITY DEPARTMENT OF NUTRITION AND DIETETICS

Karaikudi -630003, Tamil Nadu.

#### **REGULATIONS AND SYLLABUS-(CBCS-University Department)**

[For the candidates admitted from the Academic Year 2023 – 2024 onwards]

Name of the Department : Nutrition and Dietetics

Name of the Programme : M.Sc., Nutrition and Dietetics

**Duration of the Programme**: Full Time (Two Years)

#### **Choice-Based Credit System**

A choice-Based Credit System is a flexible system of learning. This system allows students to gain knowledge at their own tempo. Students shall decide on electives from a wide range of elective courses offered by the University Departments in consultation with the Department committee. Students undergo additional courses and acquire more than the required number of credits. They can also adopt an inter-disciplinary and intra-disciplinary approach to learning, and make the best use of the expertise of available faculty.

#### Programme

"Programme" means a course of study leading to the award of a degree in a discipline.

#### Courses

'Course' is a component (a paper) of a programme. Each course offered by the Department is identified by a unique course code. A course contains lectures/ tutorials/laboratory work/seminars/project work / practical training/report writing /Viva-voce, etc or a combination of these, to meet effectively the teaching and learning needs.

#### **Credits**

The Term "Credit" refers to the weightage given to a course, usually in relation to the instructional hours assigned to it. Normally in each of the courses credit will be assigned on the basis of the number of lectures/tutorials/laboratory and other forms of learning required to complete the course contents in a 15-week schedule. One credit is equal to one hour of lecture per week. For laboratory/field work one credit is equal to two hours.

#### **Semesters**

An Academic year is divided into two **Semesters.** In each semester, courses are offered in 15 teaching weeks and the remaining 5 weeks are to be utilized for conduct of examination and evaluation purposes. Each week has 30 working hours spread over 5 days a week.

#### **Medium of instruction**

The Medium of instruction for M.Sc., Nutrition and Dietetics program is English.

#### **Departmental committee**

The Departmental Committee consists of the faculty of the Department. The Departmental Committee shall be responsible for admission to all the programmes offered by the Department including the conduct of entrance tests, verification of records, admission, and evaluation. The Departmental Committee determine the deliberation of courses and specifies the allocation of credits semester-wise and course-wise. For each course, it will also identify the number of credits for lectures, tutorials, practicals, seminars etc. The courses (Core/Discipline Specific Elective/Non-Major Elective) are designed by teachers and approved by the Departmental Committees. Courses approved by the Departmental Committees shall be approved by the Board of Studies. A teacher offering a course will also be responsible for maintaining attendance and performance sheets (CIA-I, CIA-II, assignments and seminar) of all the students registered for the course. The Non-major elective programme and MOOCs coordinator are responsible for submitting the performance sheet to the Head of the department. The Head of the Department consolidates all such performance sheets of courses pertaining to the programmes offered by the department. Then forward the same to be Controller of Examinations.

### **Programme Educational Objectives- (PEO)**

PEO-1	To develop students to become health care professionals for services in			
	various fields of nutrition and nutrition management.			
PEO-2	To develop entrepreneurs and entrepreneurship skill in Food Processing			
	sectors.			
PEO-3	To understand the composition, properties, and functionality of foods, as			
	well as their impact on human health and the environment.			
PEO-4	To understand the role of nutrients in human health and disease, and			
	translating the knowledge into practical applications for promoting optimal			
	nutrition and well-being.			
PEO-5	Identify the physical, chemical, and/or microbiological changes in food			
	caused by heat, enzymes, changes in pH, freezing, incorporation of air, and			
	mechanical manipulation.			
PEO-6	To improve the quality of life through evidence-based dietary interventions			
	and nutrition support strategies tailored to the specific needs of individuals			
	across the lifespan and across various health conditions.			
PEO-7	To build competent professional Nutrition & Dieticians in hospitals and			
	specialty clinics. Thereby, the professionals can find job prospects in the			
	field as Nutrition and Diet consultants in Food service organizations like			
	Hotels, Hospitals, Geriatric homes and also as administrators of Industrial			
	canteens and other specialties.			

PEO-8	To prepare competent entry-level registered dietitian nutritionists for careers		
	in a variety of health care settings, including sports nutrition, clinical,		
	community, research, business, and food service, who will work towards		
	improving the health of society through optimal nutrition practices.		
PEO-9	To develop capacities and abilities and enable them to pursue higher		
	education and research in Nutrition and Dietetics.		
PEO-10	To revolve around improving health, preventing disease, enhancing		
	performance, and providing convenient nutritional solutions for consumers		
	by functional foods and nutraceuticals		

# Programme Specific Objectives-(PSO)

PSO-1	To gain knowledge on human physiology and nutrition in health and well-		
	being.		
PSO-2	Learn the metabolic role of biomolecules and obtain insight on the		
	national nutritional problems.		
PSO-3	Understand the special nutritional requirements for physical activities		
	related to sports and exercise.		
PSO-4	Understand the symptoms and role of various diseases and its associated		
	diets.		
PSO-5	Gain knowledge on the role of Functional foods and nutraceuticals in		
	health.		

## **Programme Outcome-(PO)**

PO-1	Students Utilize knowledge from the physical and biological sciences as a basis		
	for understanding the role of food and nutrients in health and disease processes.		
PO-2	Learners Implement strategies for food access, procurement, preparation, and		
	safety for individuals, families, and communities.		
PO-3	Students practice nutrition counselling and education as individuals, groups, and communities throughout the lifespan using a variety of communication strategies.		
PO-4	Students evaluate nutrition information based on scientific reasoning for clinical, community, and food service application and implement self-learning in future endeavors.		
PO-5	Learners acquired knowledge about professional Ethics and ethical regulations, responsibilities and norms of professional nutrition and dietetics practice.		
PO-6	Students able to analyze, identify, formulate research literature and solve nutritional deficiencies using fundamentals of clinical nutrition and dietetics,		

	physiology, food science and biochemistry and relevant domain disciplines		
PO-7	Students aware of modern tool usage, appropriate techniques, resources and		
	modern devices to compute nutritional needs with a thoughtfulness of the		
	limitations.		
PO-8	Learners recognize the need and the ability to engage in independent learning for		
	continual development as a homescience educational and communication		
	professional.		
PO-9	Students able to think critically, apply the knowledge of nutrition and dietetics to		
	the sports and space field to prevent the diseases.		
PO-10	Learners develop innovative food products to create value and wealth for the		
	betterment of the individual and society at large.		

#### Programme specific outcome

PSO-1	Students able to develop knowledge and skilled professionals to perform food and		
	nutrition analysis using various analytical tools at multi-centric facilities in India		
	and abroad.		
PSO-2	Learners inculcate problem-solving mind-sets through healthcare and industrial		
	exposure of real-world problems.		
PSO-3	Students able to develop as a Diet Counsellor, Nutrition/ Health communicator for		
	creating awareness in the society through various Communication Strategies in		
	Nutrition Education emphasizing Information Technology.		
PSO-4	Learners apply the knowledge of food processing techniques in designing and		
	enhancing the shelf life of new and existing products.		
PSO-5	Students familiarise as a successful entrepreneurs and energized professionals to		
	take up careers in academics, health care centres and food processing industries.		

#### Eligibility for admission

A candidate who has passed Bachelor's Degree under 10+2+3 pattern of education in Science (Home Science, Nutrition and Dietetics, Botany, Zoology, Biochemistry, Chemistry, Biotechnology, Microbiology, Biomedical Science, Food Science and Quality Control, Food Science & Nutrition Food service management, Food technology and Yoga/ M.B.B.S. / B.H.M.S. / B.A.M.S. / Naturopathy / Nursing /B. Pharmacy and any other relevant programs in Biological Science) with at least 55% of marks eligible for applying this programme.

#### Minimum Duration of programme

The programme is for a period of two years. Each year shall consist of two semesters viz. Odd and Even semesters. Odd semesters shall be from June / July to October / November and even semesters shall be from November / December to April / May. Each semester there shall be 90 working days consisting of 6 teaching hours per working day (5 days/week).

#### **Components**

A PG programme consists of a number of courses. The term "course" is applied to indicate a logical part of the subject matter of the programme and is invariably equivalent to the subject matter of a "paper" in the conventional sense. The following are the various categories of the courses suggested for the PG programmes:

- A. Core courses (CC)- "Core Papers" means "the core courses" related to the programme concerned including practicals and project work offered under the programme and shall cover Core competency, critical thinking, analytical reasoning, and research skill.
- B. Discipline-specific electives (DSE) means the courses offered under the programme related to the major but are to be selected by the students, and shall cover additional academic knowledge, critical thinking, and analytical reasoning.
- C. Non-Major Electives (NME)- Exposure beyond the discipline
  - > Students have to undergo a total of Non-Major Elective courses with 2 credits offered by other departments (one in II Semester and another in III Semester)
  - ➤ A uniform time frame of 3 hours on a common day (Tuesday) shall be allocated for the Non-Major Electives
  - Non-Major Elective courses offered by the departments pertaining to a semester should be announced before the end of the previous semester.
  - Registration process: Students have to register for the Non-Major Elective course within 15 days from the commencement of the semester either in the department or NME portal (University website)
- D. Self Learning Courses from MOOCs platforms.
  - MOOCs shall be voluntary for the students.
  - > Students have to undergo a total of 2 Self Learning Courses (MOOCs) one in II semester and another in III semesters.
  - > The actual credits earned through MOOCs shall be transferred to the credit plan of programmes as extra credits. Otherwise 2 credits/course be given if the self Learning Course (MOOCs) is without credit.
  - ➤ While selecting the MOOCs, preference shall be given to the course related to employability skills.

E. Projects / Dissertation /Internships (Maximum Marks: 200)

The student shall undertake the Project/Dissertation/internship during the fourth semester.

#### > Plan of work

#### **Project/Dissertation**

The candidate shall undergo Project/Dissertation Work during the final semester. The candidate should prepare a scheme of work for the dissertation/project and should get approval from the guide. The candidate, after completing the dissertation /project work, shall be allowed to submit it to the university departments at the end of the final semester. If the candidate is

desirous of availing the facility from other departments/universities/laboratories/organizations they will be permitted only after getting approval from the guide and HOD. In such a case, the candidate shall acknowledge the same in their dissertation/project work.

#### > Format to be followed for dissertation/project report

The format /certificate for thesis to be followed by the student are given below

- ➤ Title page
- > Certificate
- ➤ Acknowledgment
- > Content as follows:

#### **Teaching methods**

The Masters degree uses many approaches to attain effective learning, but when it comes to key teaching methods, seven have become universal. 1.Discussions, 2. Laboratory and practical learning, 3. Field trips, 4. Problem-based/Enquiry-based learning (PBL/EBL), 5. Projects, 6. E-learning and 7. Co-curricular activities.

#### Attendance

Students must have earned 75% of attendance in each course for appearing for the examination. Students who have earned 74% to 70% of attendance need to apply for condonation in the prescribed form with the prescribed fee. Students who have earned 69% to 60% of attendance need to apply for condonation in the prescribed form with the prescribed fee along with the Medical Certificate. Students who have below 60% of attendance are not eligible to appear for the End Semester Examination (ESE). They shall redo the semester(s) after completion of the programme

#### Examination

The examinations shall be conducted separately for theory and practical's to assess (remembering, understanding, applying, analysing, evaluating, and creating) the knowledge required during the study. There shall be two systems of examinations viz., internal and external examinations. The internal examinations shall be conducted as Continuous Internal Assessment tests I and II (CIA Test I & II).

#### A. Internal Assessment

The internal assessment shall comprise a maximum of 25 marks for each subject. The following procedure shall be followed for awarding internal marks.

Theory -25 marks

Sr.No	Content	Marks
1	Average marks of two CIA test	15
2	Seminar/group discussion/quiz	5
3	Assignment/field trip report/case study report	5
	Total	25

#### **Practical -25 Marks**

Sr.No	Content	Marks
1	Average marks of two CIA test	15 marks
2	Observation note book	10 marks
	Total	25 Marks

#### Internship- 25 Marks (assess by Guide/incharge/HOD/Supervisor)

Sr.No	Content	Marks
1	Presentations	15 Marks
2	Progress report	10 Marks
	Total	25 Marks

Project/Dissertation -50 Marks (assess by Guide /incharge /HOD/ Supervisor)

Sr.No	Content	Marks
1	Two presentations (mid-term)	30 Marks
2	Progress report	20 Marks
	Total	50 Marks

#### B. External Examination

- ➤ There shall be examinations at the end of each semester, for odd semesters in the month of October / November; for even semesters in April / May.
- A candidate who does not pass the examination in any course(s) may be permitted to appear in such failed course(s) in the subsequent examinations to be held in October / November or April / May. However, candidates who have arrears in Practical shall be permitted to take their arrear Practical examination only along with Regular Practical examination in the respective semester.
- A candidate should get registered for the first-semester examination. If registration is not possible owing to a shortage of attendance beyond condonation limit/regulation prescribed OR belated joining OR on medical grounds, the candidates are permitted to move to the next semester. Such candidates shall re-do the missed semester after completion of the programme.
- For the Project Report/ Dissertation Work the maximum marks will be 100 marks for project report evaluation and for the Viva-Voce it is 50 marks
- For the Internship the maximum marks will be 50 marks for project report evaluation and for the Viva –Voce it is 25 marks.
- ➤ Viva-Voce: Each candidate shall be required to appear for the Viva-Voce Examination (in defense of the Dissertation Work / Internship).

#### C. Scheme of External Examination (Question Paper Pattern)

**Theory - Maximum 75 Marks** 

Section A	10 questions. All questions carry equal	$10 \times 1 = 10$	10 questions – 2 each			
	marks. (Objective-type questions)	Marks	from every unit			
Section B	5 questions Either / or type like 1.a (or) b. All questions carry equal marks	$5 \times 5 = 25$	5 questions – 1 each from every unit			
Section C	5 questions Either / or type like 1.a (or) b. All questions carry equal marks	5 x8 = 40	5 questions – 1 each from every unit			

#### Practical – Maximum 75 Marks

Section A	Major experiment	15 Marks
Section B	Minor experiment	10 Marks
Section C	Experimental setup	5 Marks
Section D	Spotters (5 spotters x5 marks)	25 Marks
Section E	Record note	10 Marks
Section F	Vivo voce	10 Marks

#### **Dissertation / Project Report Maximum 150 Marks**

Dissertation /Project report	100 Marks
Vivo voce	50 Marks

# Internship report Maximum 75 Marks

Internship report	50 Marks
Vivo voce	25 Marks

#### Results

The results of all the examinations will be published through the Department where the student underwent the course as well as through University Website

#### Passing minimum

- A candidate shall be declared to have passed in each course if he/she secures not less than 40% marks in the End Semester Examinations and 40% marks in the Internal Assessment and not less than 50% in the aggregate, taking Continuous assessment and End Semester Examinations marks together.
- > The candidates not obtained 50% in the Internal Assessment are permitted to improve their Internal Assessment marks in the subsequent semesters (2 chances will be given) by writing the CIA tests and by submitting assignments.
- ➤ Candidates, who have secured the pass marks in the End-Semester Examination and in the CIA but failed to secure the aggregate minimum pass mark (E.S.E + C I.A), are permitted to improve their Internal Assessment mark in the following semester and/or in university examinations.
- A candidate shall be declared to have passed in the Project / Dissertation / Internship if he /she gets not less than 40% in each of the Project / Dissertation / Internship and Viva-Voce and not less than 50% in the aggregate of both the marks for Project / Dissertation / Internship Report and Viva-Voce.
- A candidate who gets less than 50% in the Project Report must resubmit the Project Report. Such candidates need to take again the Viva-Voce on the resubmitted Project.

#### **Grading of the Courses**

The following table gives the marks, Grade points, Letter Grades and classifications meant to indicate the overall academic performance of the candidate.

Conversion of Marks to Grade Points and Letter Grade (Performance in Paper / Course)

RANGE OF MARKS	GRADE POINTS	LETTER GRADE	DESCRIPTION
90 - 100	9.0 – 10.0	О	Outstanding
80 - 89	8.0 – 8.9	D+	Excellent
75 - 79	7.5 – 7.9	D	Distinction
70 - 74	7.0 – 7.4	A+	Very Good
60 - 69	6.0 – 6.9	A A	Good
50 - 59	5.0 – 5.9	В	Average
00 - 49	0.0	PPA UNIVERUITY	Re-appear
ABSENT	0.0	AAA	ABSENT

- a) Successful candidates passing the examinations and earning GPA between 9.0 and 10.0 and marks from 90 100 shall be declared to have Outstanding (O).
- b) Successful candidates passing the examinations and earning GPA between 8.0 and 8.9 and marks from 80 89 shall be declared to have Excellent (D+).
- c) Successful candidates passing the examinations and earning GPA between 7.5 7.9 and marks from 75 79 shall be declared to have Distinction (D).
- d) Successful candidates passing the examinations and earning GPA between 7.0 7.4 and marks from 70 74 shall be declared to have Very Good (A+).
- e) Successful candidates passing the examinations and earning GPA between 6.0 6.9 and marks from 60 69 shall be declared to have Good (A).
- f) Successful candidates passing the examinations and earning GPA between 5.0 5.9 and marks from 50 59 shall be declared to have Average (B).
- g) Candidates earning GPA between 0.0 and marks from 00 49 shall be declared to have Re-appear (U).
- h) Absence from an examination shall not be taken as an attempt.

From the second semester onwards the total performance within a semester and continuous performance starting from the first semester are indicated respectively **by** 

Grade Point Average (GPA) and Cumulative Grade Point Average (CGPA). These two are calculated by the following formulate

#### GRADE POINT AVERAGE (GPA) = $\Sigma_i C_i G_i / \Sigma_i C_i$

#### GPA = <u>Sum of the multiplication of Grade Points by the credits of the courses</u> Sum of the credits of the courses in a Semester

#### Classification of the final result

CGPA	Grade	Classification of Final
		Result
9.5 – 10.0	O+	First Class – Exemplary*
9.0 and above but below 9.5	O	
8.5 and above but below 9.0	D++	First Class with Distinction*
8.0 and above but below 8.5	D+	
7.5 and above but below 8.0	புஸ்Dணை	i.
7.0 and above but below 7.5	A++	First Class
6.5 and above but below 7.0	<b>A</b> +	1 00 m
6.0 and above but below 6.5	A	e.
5.5 and above but below 6.0	B+	Second Class
5.0 and above but below 5.5	В	8
0.0 and above but below 5.0	U	Re-appear

The final result of the candidate shall be based only on the CGPA earned by the candidate.

- a) Successful candidates passing the examinations and earning CGPA between 9.5 and 10.0 shall be given Letter Grade (O+), those who earned CGPA between 9.0 and 9.4 shall be given Letter Grade (O) and declared to have First Class –Exemplary\*.
- b) Successful candidates passing the examinations and earning CGPA between 7.5 and 7.9 shall be given Letter Grade (D), those who earned CGPA between 8.0 and 8.4 shall be given Letter Grade (D+), those who earned CGPA between 8.5 and 8.9 shall be given Letter Grade (D++) and declared to have First Class with Distinction\*.
- c) Successful candidates passing the examinations and earning CGPA between 6.0 and 6.4 shall be given Letter Grade (A), those who earned CGPA between 6.5 and 6.9 shall be given Letter Grade (A+), those who earned CGPA between 7.0 and 7.4 shall be given Letter Grade (A++) and declared to have First Class.
- d) Successful candidates passing the examinations and earning CGPA between 5.0 and 5.4 shall be given Letter Grade (B), those who earned CGPA between 5.5 and 5.9 shall be given Letter Grade (B+) and declared to have passed in Second Class.
- i) Candidates those who earned CGPA between 0.0 and 4.9 shall be given Letter Grade (U) and declared to have Re-appear.
- e) Absence from an examination shall not be taken as an attempt.

CGPA = <u>Sum of the multiplication of Grade Points by the credits of the entireProgramme</u> Sum of the credits of the courses for the entire Programme

Where 'Ci' is the Credit earned for Course i in any semester; 'Gi' is the Grade Point obtained by the student for Course i and 'n' refers to the semester in which such courses were credited.

**CGPA** (Cumulative Grade Point Average) = Average Grade Point of all the Courses passed starting from the first semester to the current semester.

Note: \* The candidates who have passed in the first appearance and within the prescribed Semesters of the PG Programme are alone eligible for this classification.

#### Maximum duration of the completion of the programme

The maximum period for completion of **M.Sc., degree** in Nutrition and Dietetics shall not exceed eight semesters continuing from the first semester.

#### **Conferment of the Master's Degree**

A candidate shall be eligible for the conferment of the Degree only after he/ she has earned the minimum required credits for the Programme prescribed therefor (i.e. 90 credits) Programme.

#### Village Extension Programme

The Sivaganga and Ramnad districts are very backward districts where a majority of people lives in poverty. The rural mass is economically and educationally backward. Thus the aim of the introduction of this Village Extension Programme is to extend out to reach environmental awareness, social activities, hygiene, and health to the rural people of this region. The students in their third semester have to visit any one of the adopted villages within the jurisdiction of Alagappa University and can arrange various programs to educate the rural mass in the following areas for three days based on the theme.

- 1. Environmental awareness
- 2. Hygiene and Health.

A minimum of two faculty members can accompany the students and guide them.

#### What to do after M.Sc., degree in Nutrition and Dietetics

Nutrition and Dietetics is one of the multi-disciplinary fields with great demand in various applications in the field of research and development. Pursuing this programme the students may opt for various higher studies like M.Phil, and PhD which will improve the chances for better jobs. An individual with a degree in Nutrition and Dietetic can work as a Nutritionist, Management Dietician, Consultant Dietician and Dietician in hospitals and clinics/Health care centers/schools/corporate organizations/NGOs technical marketing in Pharmaceuticals and Nutraceuticals Industry for nutritional support products/ nutraceuticals.

The students also have opportunity in the Research and Development, Education, Independent practice, Nutritionist in Food Industry and Freelance Clinical writing. They earn hefty amounts of salaries working as a professional in this field.

#### JOB AND CAREER OPTION FOR M.SC., NUTRITION AND DIETETICS:

M.Sc., Nutrition and Dietetics students will yield in a brighter future and gradually hold pace towards overall development of the society. Nutrition and Dietetics students can be employed as a Registered Dieticians, Nutrition Specialist, Clinical Dietician, Dietetic Technicians, Health Coach, Health Educators and Community Health Workers, Holistic Nutritionist, Rehabilitation Counselors, Sports Nutritionist. A post graduate in M.Sc., Nutrition and Dietetics may decide to become an academician or a researcher or an entrepreneur, as per their desire. After completing their studies, they also have the option of becoming an independent researcher in National/International Institutes/Universities. Overall, there are a wide range of career opportunities for the students and if the right career is explored and chosen by the students, it will provide them a life changing experience.

#### **EMPLOYMENT AREAS:**

Nutrition and Dietetics can work as a dietician in hospitals and Nutritionists in health clinics, health centers, and MNCs. Opportunity to be a registered dietician (RD). Graudates can work as a project assistant, project associate, chief nutritionist in NGO's and private organizations.

CC – Core Course

\*DSE – Student Choice and it may be conducted by parallel sections

T-Theory,

P-Practical

NME- Non-Major Elective
\*\*SLC- Self Learning Course (MOOCs) - Voluntary basis
\*\*\* Dissertation / internship report –Marks -Vivo-voce (50) + thesis (100) + internal (50) = 200

#### I - MAJOR ELECTIVE COURSES FOR THE STUDENTS

DSE – I – 558501 - Home Science Education and Communication

DSE – II – 558502 - Food Service Management

DSE – III- 558503 - Food Microbiology and Sanitation

DSE – IV – 558504 - Geriatric Nutrition

DSE – V – 558505 - Paediatric Nutrition

DSE – VI – 558506 - Biotechnology in Functional Foods and Nutraceuticals

### II - NON- MAJOR ELECTIVE COURSES

NME – I – 558701 - Basics of Human Nutrition

NME – II –558702 - Food Preservation

		SEMESTER I								
Como	Course code:	HUMAN PHYSIOLOGY	Т	Credits:5	Hours:6					
Core	558101	1	Credits:5	Hours:0						
		Unit - I								
Objective 1	Objective 1 To familiarize about the structure and function of cell organelles, muscles and									
Objective 1 rervous tissues.  CELL, CELL ORGANELLES AND TISSUES										
CELL, CELL ORGANELLES AND TISSUES										
	_	n of prokaryotic and eukaryotic cells								
	•	iology of cytoplasm. Cell organel		_						
	_	anelles: nucleus, nucleolus, endopl			-					
		osomes, peroxisomes and vacuoles.		- Classification	i, structure					
and functions		scular, connective and nervous tissues			1					
Outcome 1		derstand about the physiologic	al func	tions of cell	K2					
Outcome 1	organelles, mu	iscles and nervous tissues.			182					
		Unit - II								
Objective 2		owledge about the components of r	nusculo	skeletal system	1,					
		r system and blood.	6.7							
,		ARDIOVASCULAR SYSTEM								
	•	ucture and functions of bone, cartile	_							
	tendons. Blood -Introduction to hematology, functions of blood, plasma proteins, erythrocytes, Hb,									
important indices of RBC & WBC, Functions of blood groups, ESR, blood viscosity, blood										
•		wBC, Functions of blood grou	ps, ESF	R, blood viscos	sity, blood					
coagulation, E	rythroblastosis fe		ps, ESF	R, blood viscos	sity, blood					
•	rythroblastosis for rdiac cycle.	w WBC, Functions of blood ground ground transfusion. Cardio	ps, ESF vascular	R, blood viscos r system - Basic	sity, blood					
coagulation, E of the heart, ca	rythroblastosis for rdiac cycle.  Students able	wBC, Functions of blood ground transfusion. Cardiovertalis and blood transfusion. Cardioverto illustrate about the structure	ps, ESF vascular	R, blood viscos r system - Basic	properties

Outcome 2  Objective 3  RESPIRATO Respiratory s gaseous excha composition & Mechanism of villi, defecatio  Outcome 3  Objective 4  EXCRETOR	To educate a systems.  RY AND DIGE system - Anator nge in lungs and secretion of digen. Importance of Learners able system.  To learn about AND REPRO	etalis and blood transfusion. Cardiover to illustrate about the structure and cardiovascular system.  Unit - III about the physiological mechanism of tissues. Resuscitation and its method ivary, gastric, intestinal & pancreatic estive juices and its regulation, move the indigestive system and anatom to analyze the importance of response.  Unit - IV	ps, ESF vascular re and organs, re organs, r	functions of  espiratory and mechanism of restive system - ons. Functions of fstomach, small	kity, blood properties  K2  digestive respiration, Anatomy, f bile salts, il intestine, er.  K4  re systems					

formation and the role of the kidneys in water and electrolyte balance. Renal function tests. **Reproductive system** - Male and female reproductive organs: structure and functions. Menstruation,

menstrual cycle, puberty, menarche, menopause, fertilization, conception, implantation. **Sense organs** - Physiology of vision, hearing, taste, smell and cutaneous sensations.

Outcome 4	Students able to explain the organs of different glands in the human body.	K5			
Unit - V					
Objective 5	To educate about the changes occurring in organs due to abnorm hormone secretion by endocrine glands.	alities of			

#### ENDOCRINE, EXOCRINE AND NERVOUS SYSTEM

**Endocrine glands -** pituitary, thyroid gland, parathyroid gland, pancreas, adrenal cortex and adrenal medulla. Mechanism of action of hormones. **Exocrine glands**— Structure and functions of sweat, salivary, mammary, ceruminous, lacrimal, sebaceous, and mucous glands. **Nervous system** - General anatomy of nervous system, functions of the different parts, reflexes, autonomic nervous system.

Outcome 5	Learners	able	to	elaborate	about	the	secretion	and	release	of	K6
hormone into blood stream and target tissues.								KU

		SEMESTER I					
Core	Course code: NUTRITION AND HEALTH T Credits:5						
		Unit - I					
Objective 1 To familiarize with the importance of nutrition in health and well-being.							
Nutrition and	diet in health	- concept of adequate nutrition and	malnut	rition. Difference	e between		
menu planning Dietary Allow	g. Recommended	ifferent food groups – major nutrier dietary allowances - Basis for redr Indians, FDA Recommendations,	quireme	nts. ICMR Rec	ommended		
Outcome 1	Learners unde	rstand the basic concepts of nutriti	ion and	diet planning.	K2		
	L	Unit - II					
Objective 2	pregnancy and	owledge of nutritional status and d lactating women. Lactation -Physiological changes in	•	•			
lactation, lactaduring lactatio  Outcome 2	n. Students discu	ss about the nutritional requirement regnant and lactating women.			K4		
		Unit - III					
Objective 3	To educate on	dietary requirement during infanc	y and p	reschool stages			
Nutrition in	infancy-Nutrition	nal status of the infants, rate of gr	owth as	the indicator.	Nutritional		
allowances for	the infants, brea	st feeding Vs formula feeding, food	square,	weaning foods s	suitable for		
infants. Feeding	ng the premature	e infants and Low Birth Weight (L	BW) in	fants, reasons fo	or under 5		
Mortality Rate	e (MR). Nutritio	n in preschool age - Growth and d	evelopn	nent of preschool	ol children		
food habits a	nd nutrient inta	ke of preschool children. Dietary	allowar	nces for presch	ool age -		
supplementary							
Outcome 3	preschool children.				K4		
		Unit - IV			·		
Objective 4	To learn the co	ompetency in planning diets for sch	ool, add	olescent and add	ult age		
Nutrition dur		Physical development, nutritional st	atus of s	school going chi	ldren, food		
	1	nutrition and academic performance	- NT45	4	•		

**Nutrition during school age** - Physical development, nutritional status of school going children, food habits, nutritional requirements, nutrition and academic performance. **Nutrition during adolescence** - Changes of growth, assessment of growth – sexual maturity rating, physical, physiological and psychological changes in adolescents. Nutritional needs of the adolescent anemia, eating disorders.

**Nutrition for the adults** - Nutritional requirements according to the mode of activity. Nutrition and health of women. General nutritional problems of women, anemia, osteoporosis, pre and postmenopausal syndrome, PCOD, hormonal changes during menopause. Infertility – risk factors, methods of detection and prevention.

Outcome 4	Learners assess the growth of the children and planning about	K5
Outcome 4	nutritional requirements of school, adolescent and adult age groups.	KS

#### Unit - V

#### Objective 5 To familiarize with nutrition for sports, space travel and old age.

**Nutrition in adult and old age-** Ageing process- physiological, metabolic, body composition changes. Nutritional & health status, dietary modifications of elderly. **Nutrition in special events** - Sports nutrition - quantity of fluids and food taken by an athlete. **Space nutrition** - food product created and processed for consumption by astronauts in outer space.

Outcome	Students able to develop food products for sports nutrition, space	К6
5	travel and old age groups.	Ku

		Semester I				
Core	Course Code:	ADVANCED FOOD	T	Credits:5	Hours: 6	
	558103	SCIENCE				
Unit - I						
Objective 1	To import lynox	ladge on food numeroustion o	nd food	l anality acco	amont	

# Objective 1 | To impart knowledge on food preparation and food quality assessment FOOD PREPARATION, PROPERTIES OF FOOD AND FOOD QUALITY

Food in relation to health - Introduction to food science as a discipline and modern developments, different methods of cooking, functions of cooking food. Functional properties of foods - Definition, structure and properties of food hydrocolloids. Hydrocolloids as gelling, emulsifying, thickening, stabilizing and coating agents. Important roles of proteins (denaturation and browning), carbohydrates (caramelization and crystallization) and fats (emulsification) in altering the functional properties of food. Evaluation of food quality - Quality attributes of food – appearance factors, textural factors, and flavor factors sense of taste, texture and colour: sensory evaluation and objective evaluation. Types of sensory test. Procedures for determination and monitoring of shelf life.

Outcome 1	Students able to understand the skill on the preparation of healthy diet	32	
	Unit – II		
Objective 2 To provide knowledge about the nutritive values of cereals, millets,			
	vegetables and fruits		

#### CEREALS, MILLETS, PULSES, VEGETABLES AND FRUITS GROUP

Cereals & Millets – Nutrient composition, parboiling, Cereal cookery – gluten formation-factors affecting gluten formation. Structure of Starch granules and characteristics – effect of moist and dry heat, non-starch polysaccharides- fibres, cellulose, hemicellulose, pectic substances, gums and carboxy methyl cellulose (CMC). Nutrient composition of breakfast cereals and fermented products. Pulses- Nutrient composition, processing, anti-nutritional factors, protein foods for infants and children, soy products, protein concentrates and isolates, textured vegetable proteins. Vegetables and fruits - Nutritional importance, pigments and acids, effect of cooking on pigments and nutrients. Post-harvest changes of fruits, browning reactions- enzymatic and non-enzymatic.

Outcome 2	Learners able to compile the benefits of different food K3				
	components				
	Unit – III				
Objective	Objective To educate the nutritional value of milk, marine food and flesh food				
3					

#### MILK AND MEAT PRODUCTS

Milk and milk products—Nutrient composition of milk powders, ghee, khoa, butter, paneer, cheese and ice creams - Composition, physical and functional properties. Flesh foods - Composition, post-mortem changes in meat, tenderization, changes produced during cooking, spoilage. Effect of heat on egg proteins, egg foams, factors influencing foaming and egg products. Nutrient composition of marine foods: Fish, shrimp and sea weeds.

Outcome 3	Students able to analyze the skills of evaluating the current food habits	K4					
	Unit – IV						
<b>Objective 4</b>	To learn the importance of sugars and fats in the food						

#### NUTS, FATS, SUGAR, AND BEVERAGES

Nuts and oilseeds – Classifications and Nutrient composition. Fats and oils - role of fat in cookery, rancidity, changes of fat on heating, salad dressing. Sugar - Properties, sugar related products, crystallization, crystalline & non- crystalline candies, stages of sugar cookery, artificial

sweeteners. E	Beverages- Classification, manufacture and nutritional significance and energy							
value.								
Outcome 4	Learners able to evaluate the role of sugars, fats and nuts in today's K5							
	diet							
	Unit – V							
Objective 5 To educate about the recent development in food science and foo processing industry								
FOOD ADD	FOOD ADDITIVES, FOOD TECHNOLOGY AND RECENT DEVELOPMENT IN THE							

# FIELD OF FOOD SCIENCE

Food additives - Definition and needs for food additives, types of food additives and food safety, unintentional additives. Genetically Modified (GM) foods, Production and nutritive value of GM foods. Recent developments in the field of Food Science and Food Technology. Current research in the field of Food Science and Food Technology.

Outcome 5	Students able to discuss the various modern technology	<b>K6</b>
	and developments related to foods science

		SEMESTER I						
		Lab. I: HUMAN						
	Course code:	PHYSIOLOGY, NUTRITION						
Core	558104	AND HEALTH &	T	Credits:4	Hours :6			
	330104	AND HEALTH & ADVANCED FOOD SCIENCE						
		Unit - I						
Objective 1	To familiarize	with the impact of fundamental	skills i	n biochemical e	stimation			
•	PHYSIOLOG	1			34111441011			
	on of Glucose fro							
/	of blood Haemo							
	nation of Choleste							
Outcome 1	Learners prac	tice the skills of biochemical anal	lysis		K3			
	1	Unit - II						
Objective 2	To provide kn	owledge about the blood typing a	nd Hist	tology				
HUMAN	PHYSIOLOG							
4) Blood ty	ping							
/		tocrit, Blood Histology/ Blood Sme	ears					
	y: cells and tissue	es S ALAGARRA UNIVERSITY						
/	and osmosis	ALABAT PA DAIRLANDITA	6					
Outcome 2	Outcome 2 Students acquired practical knowledge of blood cells K4							
Unit - III								
Objective 3	To educate ab	out the vital test						
HUMAN	PHYSIOLOG	Y	-					
		<mark>e</mark> , Total <mark>nitrogen and</mark> Urea						
9) Pregnanc	•							
10) Measure		essure, pulse rate, respiratory rate			T			
Outcome 3		able to perform urine analysis,	pregna	ncy test and	K4			
	measurement	of vitals. Unit - IV						
	70. 1 1.			1				
Objective 4	the lifecycle	t planning and preparing a bal	anced (	liet for various	stages in			
	H AND NUTRI							
		ods and recipes for preschoolers.						
		ecipes for adolescents, pregnant an						
Outcome 4	Students are a	ble to evaluate the low-cost recip	es for d	lifferent stages	K5			
		Unit - V						
Objective 5	To educate ab	out the practical applications of a	advance	ed food science				
	CED FOOD SC							
13) Weights cooking)		of all food ingredients according	to food	d groups (Raw	and after			
	evaluation of foo							
		texture, flavor and taste of cereal	ls, pulse	es, vegetables, fr	uits, milk			
-	and meat produc	ts.						
	sugar cookery.							
Outcome 5	Learners are a	able to elaborate on various food	groups		<b>K6</b>

Outcome 3		o apply the concepts of home main and work simplification.	anage	men	ı and steps,	К3			
	uccisium makim	g and work simplification.							

Unit - IV											
To	learn	about	the	principles	and	elements	of	Interior	design	and	flower
arrangement.											

#### **Interior Design**

**Objective 4** 

- a) Interior Design Definition and Types
- b) Colour Definition, Classification, Prang Colour Chart, Colour Harmonies and Use of Colour in Different Rooms.
- c) Principles of Design Harmony, Balance, Proportion, Rhythm and Emphasis
- d) Elements of Design Line, Direction, Shape, Colour, Texture and Value

#### Flower arrangement

- a) Principles of Flower Arrangement Design, Scale, Balance, Harmony, Rhythm, Colour
- b) Patterns and Styles –Symmetrical and Asymmetrical, Traditional, Oriental, Modern, Dried Flower Arrangement.
- c) Guidelines, Aids and Accessories and Care of flowers

Outcome 4	Students are able to apply the principles and elements of design, flower arrangement in all art forms.	К3
	Unit - V	

#### Objective 5 To educate about the Developmental and Educational Communication

#### **Developmental and Educational Communication**

- a) Communication- Definition, Objectives, Process, Skills
- b) Types Interpersonal, Focused and Unfocused, Group, Mass, Verbal Models
- c) Barriers- Physical, Psychological, Linguistic, Cultural and Mechanical.
- d) Purpose/ Functions of Communication Essentials of good communication, Seven C's of Communication.
- e) Class room Communication in Home Science Studies

Outcome 5	Students are able to analyze the essential of good communication in	K/A
	different spheres.	N4

SEMESTER I									
DOE	Course code	FOOD SERVICE	Tr.	G 114 4	TT 4				
DSE	: 558502	MANAGEMENT	T	Credits:4	Hours :4				
Unit - I									
Objective 1 To familiarize about the basics of food service industry and infrastructure									
FOOD SERVI	CE INDUSTRY	YAND INFRASTRUCTURE							
Food service in	ndustry: Scope	of food industry and segmentation.	Organiz	zation & admir	nistration of				
food service in	dustry: types, o	organization structure and managem	ent. Phy	sical facilities	- Size and				
		en, ventilation, lighting, flooring, car	rpets, wa	all covering. Sa	mple layout				
of receiving, kit									
Outcome1	Learners und	lerstand about the employabil	ity in	food service	K2				
Outcomer	industry.				K2				
		Unit - II							
Objective 2	To provide kn	owledge about the food service ma	nageme	nt in hospitals	•				
FOOD SERVI	CE MANAGEI	MENT IN HOSPITALS							
Hospital food 1	production – M	enu planning for patients and proc	ess of f	food production	n. Different				
methods of hole	ding foods for s	service. Hospital food service manag	gement -	Principles and	l techniques				
of effective man	nagement. Tools	s of food management - Organization	al chart	of the food ser	vice team in				
hospital. Leader	rship styles, type	es and managerial abilities needed fo	r food se	ervice institutio	n.				
Outcome 2	Students able	to understand the importance of	differe	nt types of	K2				
food servicing in Hospital.									
		Unit - III							
Objective 3	To educate abo	out the <mark>equipment and material m</mark>	anagem	ent in food ind	lustry.				
FOOD SERVI	CE INDUSTRY	<mark>y – EQUIPMENT AND</mark> MA <mark>T</mark> ERL	ALS MA	ANAGEMENT					
		fication, selection, purchasing, care							
		ance in food service institution. Ha							
		role and maintenance in food so							
•	* *	Good materials, receiving & storing							
materials.	C	WOUNDERGETTE			C				
Outcome3	Learners able	to analyze the different equipmen	nt used i	in the food	K4				
Outcomes	service industr				124				
		Unit - IV							
Objective 4 To learn about the preparation, service and sanitation of food									
		AND SANITATION OF FOOD							
Quantity food	preparation -	Types of menu, menu planning,	purcha	sing, storage,	production				
		d non-conventional sources of en							
		d benefits and portion control. Sty			-				
		e, vending and mobile food service			d hygiene -				
Environmental	• •	ation, safe food handling practices, p		• •					
Outcome 4	Students are a the food service	ble to explain environmental hygic e industry	ene and	sanitation in	K5				
	the root service	C HIMMOU J.							

Unit - V	
resource management and marketing in the food	

## Objective 5

#### HUMAN RESOURCE MANAGEMENT, MARKETING AND DIETARY ACCOUNTING

Human resource management - Recruitment & selection, induction, training, performance appraisal. Importance of communication, employee benefits, laws governing food service establishment. Marketing -Definition, marketing as a managerial function, marketing mix and promotion in food service. Dietary accounting - Definition and principles. Journal and ledger. Book of account – cash book, purchase book, sales book, purchase returns & sales returns book.

, <u>1</u>				
Outcome5	Learners are able to elaborate on the marketing of food and related			
Outcomes	dietary products		<b>K</b> 6

		,	SEMIESTEK-II							
Core	CourseCode:	NUTRIT	TIONAL BIOCH	EMISTRY	T	Credits:5	Hours: 5			
	558201									
			Unit -I							
Objective 1 To familiarize about the nutritional aspects of carbohydrates.										
CARBOHYDRATES										
Carbohydrates - Classification, physical and chemical properties. Nutritional aspects of										
	carbohydrate, sources, biological role. Carbohydrate metabolism - Glycolytic pathway,									
, ,	Glycogenesis, Glycogenolysis, Gluconeogenesis & TCA Cycle. Deficiency diseases Inborn errors									
•	of carbohydrate metabolism.									
Outcome1	Learners	understar	nd about the c	lassification	, m	etabolism	and K2			
	nutritional	l importan	ce of carbohydra	tes.						
			Unit II							
Objective 2	To provide	knowledg	e about the comp	onents of pr	otei	ins and lipid	ls.			
<b>PROTEINS A</b>	ND LIPIDS	C. L.	- 0 -	9						
<b>Proteins-</b> Cla	ssification, phys	ical and ch	nemical properties	s, sources, b	iolo	gical role ar	nd value of			
protein. Prot	ein metabolism	- Protein	synthesis, Tran	samination,	dea	mination U	rea Cycle,			
deficiency dis	seases and inborn	errors of	protein metabolisi	n. Lipids -	Clas	sification, p	hysical and			
chemical prop	perties, sources, b	oiological ro	ole. Lipid metabol	ism– β-oxida	atioı	n. Nutritiona	l aspects of			
lipids, lipid ba	lipids, lipid based metabolic diseases, In-born errors of lipid metabolism.									
Outcome2	Students able	to under	stand <mark>about</mark> bio	<mark>logical role</mark>	ar	d nutrition	nal K2			
	aspects of prote	eins and lip	o <mark>ids</mark> in maintain a	healthy bio	logi	cal system.				
			Unit III			<del>-</del>	·			
Objective 3	To educate abo	ut the biol	ogical importanc	e of vita <mark>min</mark> s	s an	d minerals.				
VITAMINS A	ND MINERALS	S		L.7						
Fat soluble V	itamins - Chara	acteristics,	role of vitamins	in metaboli	sm,	deficiency	and excess			
effects. Water	soluble Vitamin	s - Charac	teristics, role of v	vitamins in 1	neta	bolism, defi	iciency and			
excess							effects.			
Macro Miner	als - Absorption	& role of	minerals in meta	bolism, mine	erals	deficiency	and excess			
effects. Micro	Minerals - Abs	sorption &	role of minerals i	in metabolis	m, r	ninerals defi	iciency and			
excess effects.										
Outcome3	Learners able t	to discuss a	bout the importa	nce of vitan	nins	and minera	ls. K6			
			Unit IV							
Objective 4	To learn	about the	significance of nu	ıcleic acids	and	enzymes in	biological			
	system.					-				
NUCLEIC AC	CIDS AND ENZ	YMES								
Nucleic acids	- DNA & RNA	, structure	, function. Nuclei	ic acids met	abo	lism, genetic	disorders.			
Enzymes - C	<b>Enzymes</b> - Classification, nomenclature, mechanism of enzyme action, enzyme specificity,									
application of	enzymes. Enzym	e activity -	Factors affecting	enzyme acti	ivity	, Co- enzym	es and Co-			
factors.		-		-		-				
Outcome4	Students	able to ide	ntify the role of n	ucleic acids	and	enzymes.	К3			
			Unit V							
Objective 5	To educat	e about t	the role of hor	mones, buf	fers	and electi	rolytes in			
			um of the body.	•			•			
HORMONES	, BUFFERS ANI		•							
**	D 1 0 1	т.	1 1 .	1			**			

Hormones - Role of hormones. Interrelation between hormones and nutrients. Hormone deficiency diseases. Acid base balance - normal health, major sources of acid produced in the body, buffers, physiological role of different buffer systems. Fluid and electrolyte balance -

**SEMESTER-II** 

Maintenance in normal health. Diseases of electrolytes imbalance. Role of nutrients in maintenance of fluid and electrolyte balance during disease condition.

Learners able to determine the role of hormones deficiency, Outcome 5 physiological role of buffers and electrolytes.

		SEMESTER II								
Core Course code: COMMUNITY NUTRITION T Credits:5 Hours :5										
		Unit - I								
Objective 1 To obtain insight on the national nutritional problems and their implications.										
ASSESSMENT OF NUTDITIONAL STATUS										

Assessment of nutritional status - food and nutritional problems in the community. Nutritional status of an individual and community. Direct method of nutritional assessment: nutritional anthropometry, biochemical methods, clinical examination and dietary survey. Indirect method of nutritional assessment: Age Specific Mortality Rates, Cause Specific Mortality Rates, Cause Specific Nutritionally - Relevant Morbidity Rate, Ecological Factors.

Outcome 1	Students able to identify their own nutritional status and their family status.	К3
	Unit - II	
	Unit - II	

# Objective 2 | To provide knowledge on the problem of malnutrition in India.

#### MALNUTRITION OVERVIEW AND MALNUTRITION IN INDIA

Protein-energy malnutrition (PEM) - Aetiology, prevalence, symptoms and preventive measures. Ecology of malnutrition, nutrition and infection, Nutritional disorders: anemia, vitamin A deficiency, iodine deficiency disorder – Nutrient deficiency control programme. Prevalence of malnutrition in India: Common nutritional problems-prevalence, morbidity and mortality rate. Strategies to overcome malnutrition in India - Need for an integrated approach to solve the problems of malnutrition.

Outcome 2	Learners able to understand the current status of malnutrition in India.	K2
	Unit - III	
Objective 3	To educate knowledge about nutrition intervention programme.	

#### NUTRITION INTERVENTION PROGRAMMES

Objectives and operation of nutrition intervention programmes. Nutrition intervention programmes - Role of Environmental sanitation and Health status. Other programmes organized by governmental and non-governmental agencies for the vulnerable sections of the population.

Outcome 3 Students able to assess the role of nutrition intervention programme for eradication of malnutrition.
Unit - IV
Objective 4 To provide knowledge about the organizations concern with malnutrition and nutrition education.

#### ORGANIZATIONS CONCERNED WITH MALNUTRITION AND NUTRITION **EDUCATION**

International organizations concerned with food and nutrition, FAO, WHO, UNICEF, CARE, AFPRO, CWS and World Bank. National organizations concerned with food and nutrition- ICMR, ICARM, CHEB, CSWB and SSWB. Nutrition education - nature and importance to the community. Training workers in nutrition education and extension work.

Outcome 4	Students acquire knowledge about nutrition education programme.	К3					
	Unit - V						
Objective 5	To Learn the principles of planning and executing nutritional education						
Objective 3	programme.						

# NUTRITION EDUCATION PROGRAMMES, FOOD PRODUCTION AND FOOD SPOILAGE

Principles of planning, executing and evaluating nutrition education programmes, problems of nutrition education programmes. A brief review of losses of foods in the post-harvest period. Green, Blue, White and Yellow Revolution. Agriculture planning, role of food technology. Food production -Objectives in agriculture planning in relation to nutrition. Recent advances and research in the field of community nutrition.

# Outcome 5 Students able to discuss the plan and execution of nutritional education programme. K6

#### Unit - V

Objective 5 To Comprehend the processes for ensuring food safety and hygiene, including microbiological quality control and food-borne illness analysis

#### FOOD SAFETY, PACKING AND FOOD STANDARDS

Food Sanitation and safety – Personal hygiene-care of hands, sanitation, equipment plant, plant constructions, personal facilities, water supplies and sewage disposal. Food packaging – Packaging methods. Moisture sorption properties of foods and selection of packaging materials. Interactions between packaging and food toxicity hazards. Packaging laws and regulations. Bar coding - Nutrition labeling and nutrition claims, coding of food products. Food laws and standards -Bureau of Indian standards - PFA, FPO, MMPO, AGMARK, CCFS, CFL, BIS & FSSAI - Consumer protection act, 1986. International standards- Codex Alimentarius, ISO, WHO, FAO, WTO and HACCP.

### Outcome 5

Learn about the impact of hygiene and food safety on food production and how it affects the food's microbiological state and quality.

K2

		SEMESTER II			
DSE	Course Code: 558504	GERIATRIC NUTRITION	Т	Credits:4	Hours:4
		Unit-I			
Objective		arize about the multifaceted aspects	of aging		
Changes ass	Indian scenario, Epid sociated with ageing p		• ·		
	-	nd about the ageing changes associat Unit II	,	geing proces	K2
Objective 2	To provide knowled	dge about the Cellular aspects of age	eing		
Cellular ası	pects of ageing:				
skeletal, neu	aral (including brain a	composition gastrointestinal, cardiac nd spinal cord), endocrine and metabo			
and nutrition					
		ageing: constipation, impaired fluid	d and ele	ctrolyte bala	nce, altere
	ation, sleep disturban				
Outcome 2	Students are able to	o illustrate the cellular and Physiolog	gical chan	ges of aging.	<b>K2</b>
		Unit III			
	interventions.	t the common molecular theor		geing and	nutritiona
		ageing and nutritional interventions			
		dogenous and exogenous. Benefits			
	•	s influen <mark>cing and dietary plans</mark> for se	enior citize	ens. Promotin	ig successfu
0	tional and modern me				
Outcome 3	Students are able dietary plans for s		ments – f	actors influe	encing K4
		Unit IV			
Objective 4	To learn about the	Nutritiona <mark>l and health status</mark> of elde	rly		
Nutritional	and health status of	elderly:			
Factors influ	uencing food consump	otion and nutritional status of elderly.	Under nut	rition in the E	Elderly - ris
factors, Con	nmon diseases in elde	erly: Etiopathogenesis, manifestations	and interv	rentions - Gas	strointestina
		spiratory diseases, mental changes			
		nd muscle related abnormalities, Sarc			
		. Nutrient drug interactions	* ′	•	
Outcome 4		to explain the risk factors of comm	on disease	es and the ro	ole of K5
		evention of age-related disease			

#### Unit V

# Objective 5 To educate about the Assessment of nutritional status

Assessment of nutritional status - mini nutrition index, assessment of frailty. programmes of the government and NGO sector pertaining to the elderly. Promoting fitness and well being- use of various modern and traditional approaches.

**NOTE:** Unit V is to be done through field visits and as independent project through the following:

- 1. Visit to old age homes
- 2. Assessment of physical fitness, food intake and nutritional status
- 3. Planning and preparation of diets for the elderly in health and sickness.
- 4. Developing protocol for promoting fitness and health vis-à-vis health status/disease.

Unit – V							
Objective 5	To Inculcates statistical methods in biological research						
0 (4) (1) N. (1) 1	(D: 4 (1 (1 )						

#### **Quantitative Methods (Biostatistics)**

Principles and practice of statistical methods in biological research, basic statistics, data collection, significance tests, Students t-test, Analysis of variance-ANNOVA, correlation regression, chi – square test, and Duncan's multiple tests. Identifying Groups- Factor analysis and cluster analysis (eg., SPSS).

Outcome 5	Emphasize the role of statistical methods in biological	<b>K2</b>
	research

		velopment, assessment of nutritional status.							
	*	rameters, clinical & dietary data of infants. Nutri-	tional an	d food					
requirements for		nization schedule during infancy and childhood.							
Outcome1	Learners Guio	le the immunization of infants to the parous mot	thers in	К3					
		Unit - II							
Objective 2	To provide kn	owledge about the nutritional management of in	fants an	d ailments					
signs- cyanos distention, fail	is, jaundice, require to pass meco	t's lactation. Identification of newborn sickness-Despiratory distress. Bleeding, seizures, refusal annium and urine of sick newborn.  to understand the nutritional management	nd feed,						
Outcome 2	infants and yo	ung children.		K2					
	I	Unit - III							
Objective 3	To educate a children.	bout the importance of nutritional care and	nourish	ment of					
		INFANTS - MALNUTRITION							
		nalnutrition -Protein-energy malnutrition (PEM).							
		Childhood Obesity – Causes and Complications	3. Under	weight and					
overweight nut		n and long-term consequences in infants		T					
Outcome 3	Learners able clinical nutriti	to apply the curing of malnutrition in infants thron.	ough	К3					
		Unit - IV							
		t clinical nutrition in infants and other clinical co		<b>5.</b>					
		INFANTS – OTHER CLINICAL CONDITIONS							
		Disturbances – Constipation, Diarrhoea. Nutritional							
• •	*	fants. Nutritional management of Renal disorders. N	<b>Nutrition</b>	al					
management o	f cardiovascular			T					
Outcome 4		able to analyze the Nutritional manageme diseases through clinical nutrition.	nt of	K4					

#### Unit - V

### **Objective 5**

To provide knowledge on the nutritional management of children with special conditions

#### NUTRITIONAL MANAGEMENT FOR CHILDREN WITH SPECIAL CONDITIONS

Lactose intolerance, celiac disease, inflammatory bowel disease, fat absorption test diet of children. (Calculation of fluids & electrolytes-both deficit and maintenance and management of calorie intake). Nutritional management for children with special conditions - Autism and ADH (Attention Deficit Hyperactivity disorder), epilepsy and AIDS. Measuring, recording and plotting growth of children. Recent advances and research in the field of pediatric nutrition.

# Outcome Stud

Students are able to evaluate the appropriate nutrition management for children with special condition.

PLANT	METABOLI	TES AND NON- NUTRIENT								
bioavaila saponin, Condimo nutrients	NUTRIENTS  Alkaloids, Glucosinolates, Terpenoides and Phenolics- Chemistry, classes, sources, bioavailability and effects on human health. Antinutrients present in food: Phytate, saponin, haemagglutinins. Inhibitors - protease, amylase and lipase. Spices and Condiments- nutritive value and its uses in cooking. Supplementary effect of specific nutrients: Proteins, Peptides and nucleotides, Conjugated linoleic acid and n-3 fatty acids, Natural antioxidants.									
Outcom										

	Unit – IV
Objective 4	Tounderstand the nutraceuticals sources, mechanism of action
	and chemical nature.

#### PROPERTIES, STRUCTURE AND FUNCTIONS OF NUTRACEUTICALS

Introduction to nutraceuticals as science - Historical perspective, classification, scope & future prospects. Applied aspects of the nutraceutical science: Sources of Nutraceuticals. Relation of Nutraceutical Science with other Sciences: Medicine, Human physiology, genetics, food technology, chemistry and nutrition. Properties, structure and functions of various nutraceuticals - Glucosamine, Octacosanol, Lycopene, Carnitine, Melatonin and Ornithine alpha ketoglutarate. Use of Proanthocyanidins, grape products, flaxseed oil as Nutraceuticals.

Outcome 4	Associate the	health	benefits	of	nutrient	K4
	supplements.					
	Lillin	Unit –	V	8/_		
Objective 5	To study	the nutra	aceuticals	supp	lements and re	emedies.

# NUTRACEUTICAL SUPPLEMENTS AND REMEDIES FOR VARIOUS DISEASE CONDITIONS

Nutraceutical rich supplements- Bee pollen, Caffeine, wheat grass, Lecithin, Mushroom extract, Chlorophyll, Kelp and Spirulina. Green tea, grape tea, and Blue Tea. *Garcinia cambogia* and *Aloe vera*. Food as remedies: Nutraceuticals bridging the gap between food and drug. Medicinal plant derived nutraceuticals: Anti aging, anti-inflammatory compounds.

Nutraceutical remedies for Arthritis and Bone disorders, Bronchitis, circulatory problems, Diabetes, Nephrological disorders, Liver disorders, Neurological disorders, Psoriasis and related skin disease and GI complications.

Outcome 5	Recommends the different nutraceutical remedies for	K2
	treating various diseases.

		SEMESTER IV		
Core	Course code : 558401	DISSERTATION	Credits: 17	Hours:30

**Objectives:** To provide knowledge about the basics of research theory and techniques and understand how to do a literature review and how to appraise the literature to address questions.

#### **Preliminary**

- 1. Title Page- title, Authors Name
- 2. Certificate of Originality by the Guide
- 3. Declaration by the Author
- 4. Table of Contents
- 5. List of Tables
- 6. List of Figures
- 7. Acknowledgement
- 8. Abstract

#### > Format to be followed for dissertation/project report

- I. Introduction: Statement of the Problem, Significance, Need for the Study, Objectives, and Definitions.
- II. Review of Literature
- III .Methodology: Tools used, Procedures, Hypothesis.
- IV. Results and Discussion: Tables and Figures, Statistical Presentations, Hypothesis Testing.
- V. Summary and Conclusion
- VI. Suggestion for the Future Study
- VII.References

**Outcomes:** Learners acquire in-depth knowledge about work-based research projects at postgraduate level.

SEMESTER II										
NME Course code: Basics of Human Nutrition T Credits: 4 Hours: 3										
		Unit - I								
Objective 1 To familiarize about the importance of nutrition in health and wellbeing.										
Basic Concept of Health - Health: definition, importance of health, malnutrition: under										
nutrition, over nutrition, factors associated with malnutrition: prevalence, dietary										
recommendations, RDA- ICMR. Functions of food: food groups, classification of food										
groups. Intera	action between f	ood and health: Role of food in h	nealth pro	omotion.						
Outcome 1 Students able to understand the basic concepts of health and food. K2										
		Unit - II	-							
		e concept of macro nutrients.			1 .					
<b>Macro Nutrients</b> - Nutrients: definition, classification, macronutrients: Carbohydrates: functions, requirements, food sources, deficiencies and recommended intake. Proteins: functions, requirements, food sources, deficiencies and recommended intake. Fats: functions, requirements, food sources, deficiencies and recommended intake.										
Outcome 2	Students acqu macronutrien		of		К2					
Unit - III										
Objective 3   To obtain knowledge about Micronutrients  Micronutrients: Vitamins and minerals: Fat soluble vitamins: functions,										
		deficiencies and recommende								
_		nents, food sources, deficiencies								
	-									
Macro minerals: functions, requirements, food sources, deficiencies and recommended intake. Micro minerals: Functions, requirements, food sources, deficiencies and										
recommende		unctions, requirements, root	sources,	deficiency	es una					
Outcome 3		uire knowledge on Micronutrie	nts in he	ealth.	K2					
Outcome 3   Learners acquire knowledge on Micronutrients in health.   K2   Unit - IV										
Objective 4 To provide knowledge on planning dietary management for different age groups.										
Life Cycle Nutrition - Nutritional needs, nutritional deficiencies, RDA and dietary										
measures for the following groups: Infancy, Pre-school, School going, Adolescents,										
Pregnancy, Lactation, Adulthood and old age.										
Outcome 4	Students able human life	to interpret the nutritional nee	ds in ea	ch stage of	K5					
	Unit - V									
Objective 5	To familiarize	with nutrition for sports, spac	e travel	and old age	<u>.</u>					
		-Communicable Diseases: caus	-	=						
_	•	nagement, Epidemiology, Preva								
Vaccinatio	on schedule, Pro	eventive measures, diet therapy	7. Comn	nunicable di	seases:					

Typhoid, tuberculosis, cholera, chicken box, hepatitis, SARS, and covid-19. Non-communicable diseases: Hypertension, CVD, cancer, renal disorders, liver disorders.

Outcome Learners acquire knowledge on Communicable and noncommunicable disease.

PRESERVATION BY MOISTURE CONTROL AND OSMOTIC PRESSURE  Concept of drying and dehydration, differences between sun drying and dehydration (i.e. mechanical drying). Factors affecting rate of drying, types of driers used in the food industry. Preservation by high concentration of sugar, preservation by high concentration of sugar preservation by high concentration of sugar preservation by hig										
Outcome 2 Students able to understand the fundamentals of food spoilage in different kinds of food products.  Unit - III  Objective 3 To learn knowledge about preservation by low and high temperature.  PRESERVATION BY LOW AND HIGH TEMPERATURE  Principle of freezing, changes occurring during freezing. Types of freezing - slow freezing, quick freezing. Heat preservation methods: Sterilization, Pasteurization and blanching.  Outcome 3 Learners able to understand the preservation methods in low and high temperature.  Unit - IV  Objective 4 To educate about preservation by moisture control and osmotic pressure.  PRESERVATION BY MOISTURE CONTROL AND OSMOTIC PRESSURE  Concept of drying and dehydration, differences between sun drying and dehydration (i.e. mechanical drying). Factors affecting rate of drying, types of driers used in the food industry. Preservation by high concentration of sugar, preservation by high concentration of salt.  Outcome 4 Students are able to understand the various preservation methods such as moisture control and osmotic pressure.  Unit - V  Objective 5 To learn about the Preservation by Irradiation  PRESERVATION BY IRRADIATION  Preservation by Irradiation: Units of radiation, kinds of ionizing radiations used in food							l and cereal
